JODHPUR FEUDATORY - KUCHAMAN

Kuchaman was a semi-independent feudatory. The Thakur of Kuchaman, an Udawat Rajput, was the only feudatory of Jodhpur permitted to strike his own coinage.

Refer also to Gwalior-Ajmir Mint and Maratha Confederacy-Ajmir Mint.

JUNAGADH

A state located in the Kathiawar peninsula of Western India was originally a petty Rajput kingdom until conquered by the Sultan of Ahmadabad in 1472. It became a Mughal dependency under the Emperor Akbar, administered by the Ahmadabad Subah. In 1735, when the empire began to disintegrate, a Mughal officer and military adventurer, Sher Khan Babi, expelled the Mughal governor and asserted his independence. From that time until Indian independence his descendents ruled the state as nawabs. In 1947 the Nawab of Junagadh tried to accede to the new nation of Pakistan but the Hindu majority in the state objected and Junagadh was absorbed by the Republic of India.

Junagadh first entered into treaty relations with the British in 1807 and maintained a close and friendly association with the Raj. In 1924 this relationship was formalized when Junagadh was placed under an Agent to the Governor General in the western India States. In 1935 the state comprised 3,337 square miles with a population of 545,152, four-fifths of whom were Hindus.

KALAT

Khelat or Kelat

A state located in Baluchistan, Pakistan.

The Khanate of Kalat had originally been a feudatory of Kabul. Its ruler, the wali, later became a trusted leader in the army of Ahmad Shah Durrani, who in 1761 invaded India and crushed both Mughal and Maratha forces at the battle of Panipat. In 1839 Kalat was taken by the British, and the wali, Mehrab Khan, was killed. The victors then installed his son, Nasir Khan, as ruler and in 1854 a formal treaty was executed. From that time Kalat came under British control, with the Government of India frequently acting as referees in disputes between the wali and his chiefs. In 1893 the wali was deposed for misrule and Kalat's mint was closed.

KARAULI

State located in Rajputana, northwest India.

Karauli was established in the 11th century by Jadon Rajputs, of the same stock as the royal house of Jaisalmir. They are thought to have migrated to Rajasthan from the Mathura region some years earlier. The state passed successively under Mughal and Maratha suzerainty before coming under British authority in 1817.

The Maharajas of Karauli first struck coins in the reign of Manak Pal.

KISHANGARH

The maharajas of Kishangarh, a small state in northwest India, in the vicinity of Ajmer, belonged to the Rathor Rajputs. The town of Kishangarh, which gave its name to the state, was founded in 1611 and was itself named after Kishen Singh, the first ruler. The maharajas succeeded in reaching terms with Akbar in the late 16th century, and again in 1818 with the British. In 1949 the state was merged into Rajasthan.

KOLHAPUR

Maratha state in southwest India between Goa and Bombay.

The maharajas of Kolhapur traced their origins and ancestry to Raja Ram, son of Shivaji, the founder of the Maratha kingdom, and to his courageous wife Tarabai who officiated as regent on behalf of her son after Raja Ram's death in 1698. Kolhapur's existence as a separate state dates from about 1730 when a family quarrel left Sambaji, the great-grandson of Sivaji, as the first raja of Kolhapur. In recognition of their special eminence among the Maratha chieftains the rulers of Kolhapur bore the honorific title of "Chhatrapati Maharaja". Between 1811 and 1862 Kolhapur concluded a series of treaties and agreements with the British whereby the state came increasingly under British protection and control.

The mint closed ca. 1850AD.

KOTAH

Kotah State, located in northwest India, was subdivided out of Bundi early in the 17th century when it was given to a younger son of the Bundi raja by the Mughal emperor. The ruler, or maharao, was a Chauhan Rajput. During the years of Maratha ascendancy, Kotah fell on hard times, especially from the depredations of Holkar. In 1817 the State came under treaty with the British.

KUTCH

State located in northwest India, consisting of a peninsula north of the Gulf of Kutch.

The rulers of Kutch were Jareja Rajputs who, coming from Tatta in Sind, conquered Kutch in the 14th or 15th centuries. The capital city of Bhuj is thought to date from the mid-16th century. In 1617, after Akbar's conquest of Gujerat and the fall of the Gujerat sultans, the Kutch ruler, Rao Bharmal I (1586-1632) visited Jahangir and established a relationship which was sufficiently warm as to leave Kutch virtually independent throughout the

Mughal period. Early in the 19th century internal disorder and the existence of rival claimants to the throne resulted in British intrusion into the state's affairs. Rao Bharmalji II was deposed in favor of Rao Desalji II, who proved much more amenable to the Government of India's wishes. He and his successors continued to rule in a manner considered by the British to be most enlightened and, as a result, Maharao Khengarji III was created a Knight Grand Commander of the Indian Empire. In view of its geographical isolation Kutch came under the direct control of the Central Government at India's independence.

First coinage was struck in 1617AD.

MONETARY SYSTEM

1/2 Trambiyo = 1 Babukiya
2 Tramiyo = 1 Dokda
3 Trambiyo = 1 Dhinglo
2 Dhinglo = 1 Dhabu
2 Dhabu = 1 Payalo
2 Payalo = 1 Adlinao
2 Adlina = 1 Kori

NOTE: All coins through Bharmalji II bear a common type, derived from the Gujarati coinage of Muzaffar III (late 16th century AD), and bears a stylized form of the date AH978 (1570AD). The silver issues of Bharmalji II also have the fictitious date AH1165. The ruler's name appears in Devanagri script on the obverse.

LADAKH

Ladakh, a district in northern India, contained the western Himalayas and the valley of the upper Indus River. Area: 45,762 sq. mi. Capital: Leh.

In 1639, the Moghuls marched on Ladakh and defeated them near Karpu. King Sen-ge-rnam-rgyal promised to pay tribute if allowed to return home, but never did. In1665, the Moghul governor of Kashmir demanded the acceptance of Moghul suzerainty under threat of invasion. Knowing the strength of Aurangzeb, King Deb-Idan-rnam-rgyal sent a tribute of gold ashraphis, rupees and other precious objects. It is probable that coins were

struck for this occasion in the name of Aurangzeb, but no such coins have yet been discovered.

For the next century, no further mention is made of coins until in 1781, it is recorded that a Muslim goldsmith from Leh was hired to strike Ladakhi coins called ja'u.

The obverse of the first Ladakhi timashas or ja'u is a close copy of the Farrukhsiyar inscription of the early Garhwali timashas even including the regnal year at the bottom. The reverse has a clearly written "Zarb Tibet" at the bottom and dots at the top. At the center are crescents and an illegible inscription.

On some of the early Ladakh coins Hejira dates appear which coincide with the period when the Garhwal mint was closed and trade was diverted from Garhwal to Ladakh. No other Ladakh coins of this first issue have been discovered with a literate date. Between 1781 and 1803 it is likely that a considerable number of ja'u were struck. Most specimens were of good silver, but later issues were very debased because of the scarcity of silver.

The next type of coin has a different obverse with the Muslim title of the King of Ladakh clearly inscribed, as well as the number 14 at the lower left. This issue may have been prompted to demonstrate Ladakhi independence and is the only ja'u to bear a date.

The most remarkable of all Ladakhi coins has a fully legible inscription on the obverse in smaller writing and is enclosed in a circle with no regnal year. The reverse legend refers to the prime minister as well as the title of the king. It is the only Ladakhi coin to do so and is very rare.

The appearance of Mahmud Shah on the obverse of the next type coin is thought to acknowledge suzerainty of the ruler of Kashmir. There is a plain circle surrounded by a border of dots. The reverse reverts to the earlier designs, but has a finer style with thicker writing.

The next change in type took place after the conquest of Ladakh by Gulab Singh and the Dogra army in 1835.After a crushing defeat of the Dogra army in Tibet, the Ladakhis tried to shake off the Dogra supremacy, but the rebellion was crushed. Ladakh was now firmly incorporated within the Empire of Jammu and the monarchy was abolished. Until 1845, Gulab Singh acknowledged Sikh suzerainty but ruled Ladakh as a part of Jammu.

After the defeat of the Sikhs by the British, Gulab Singh offered to pay the war indemnities to the British in exchange for being made independent ruler of Jammu and Kashmir.

Two types of ja'u were struck during the period of the Dogra domination. One combined the tiger knife and Mahmud Shah design and the other the tiger knife and Raja Gulab Singh in Nagari script.

Between 1867 and 1870 an issue of copper coins was made for Ladakh for local use and in 1871, a small issue of ja'u was made. Neither of these coins seemed to have much commercial impact in Ladakh and their issue was suspended after 1871. No special currency was struck in or for Ladakh after this.

LUNAVADA

This small state in the Panch Mahal district of western India was ruled by Solanki Rajputs who claimed descent from Sidraj Jaisingh, the ruler of Anhalwara Patan and Gujerat. The rulers, or maharanas, traced their sovereignty to the early decades of the 15th century. At different times the State was feudatory to either Baroda or Sindhia.

MAKRAI

The rajas of Makrai belong to a very ancient Gond family whose title, Raja Hatiyarai, had been conferred upon them by the emperors of Delhi. This small state of some forty-five villages struggled with varying degrees of success against the Poona Peshwa, Sindhia and the Pindaris before passing under British protection in the 19th century.

MALER KOTLA

Cis-Sutlej state located in the Punjab in northwest India, founded by the Maler Kotla family who were Sherwani Afghans who had traveled to India from Kabul in 1467 as officials of the Delhi emperors.

Coins are copies of rupees of Ahmad Shah Durrani and, except for the last ruler, contain the chief's initial on the reverse. The chiefs were called Ra'is until 1821, Nawabs thereafter.

In 1849 the Punjab was annexed and the Cis-Sutlej states were merged into the new province of British India. Most of the Cis-Sutlej states distinguished themselves on the side of the British during the great revolt of 1857.

For similar issues see Jind, Nabha and Patiala.

MEWAR

State located in Rajputana, northwest India. Capital: Udaipur.

The rulers of Mewar were universally regarded as the highest-ranking Rajput house in India. The maharana of Mewar was looked upon as the representative of Rama, the ancient king of Ayodhya - and the family, who were Sesodia Rajputs of the Gehlot clan, traced its descent through Rama to Kanak Sen who ruled in the 2nd century. The clan is believed to have migrated to Chitor from Gujarat sometime in the 8th century.

None of the indigenous rulers of India resisted the Muslim invasions into India with greater tenacity than the Rajputs of Mewar. It was their proud boast that they had never permitted a daughter to go into the Mughal harem. Three times the fortress and town of Chitor had fallen to Muslim invaders, to Alauddin Khilji (1303), to Bahadur Shah of Gujarat (1534) and to Akbar (1568). Each time Chitor gradually recovered but the last was the most traumatic experience of all. Rather than submit to the Mughal onslaught, the women burned themselves on funeral pyres in a fearful rite called jauhar, and the men fell on the swords of the invaders.

After the sacking of Chitor, the rana, Udai Singh, retired to the Aravali hills where he founded Udaipur, the capital after 1570. Udai Singh's son, Partab, refused to submit to the Mughal and recovered most of the territory lost in 1568. In the early 19th century Mewar suffered much at the hands of Marathas - Holkar, Sindhia and the Pindaris - until, in 1818, the State came under British supervision. In April 1948 Mewar was merged into Rajasthan and the maharana became governor Maharaj pramukh of the new province.

MYSORE

Mysore is a large state in Southern India. Governed until 1761AD by various Hindu dynasties, then by Haider Ali and Tipu Sultan.

In 1831, Krishnaraja being deposed for mal-administration and pensioned off, the administration of Mysore State then came directly under the British. The coinage of Mysore ceased in 1843. After the Great Revolt of 1857, the policy of eliminating Indian princes was discontinued and as a result, Mysore was returned in 1881 to the control of an adopted son of Krishnaraja Wodeyar. The Wodeyars continued to hold the State until 1947 although they did not issue coins. In November 1956 modern Mysore was inaugurated as a linguistic state within the Indian Union.

NOTE: For earlier issues see Mysore, Independent Kingdoms during British rule.

RULERS
Dewan Purnaiya, regent for Kishnaraja Wodeyar AH1214-1225/1799-1810AD
Krishna Raja Wodeyar, AH1225-1285/1810-1868AD

NABHA

Cis-Sutlej state located in the Punjab in northwest India and founded in the 18th century.

The ancestry of these rulers was identical to that of Jind. Until 1845 Nabha's history closely paralleled that of Patiala. At this point, however, the raja sided with the Sikhs. It was left to his son to make amends to the British in 1847 after the first Sikh war (1845-46). Their independence became somewhat circumscribed and in 1849 the Punjab was annexed and the states were merged into the new province of British India.

NAWANAGAR

(Navanagar)

State located on the Kathiawar peninsula, west-central India.

The rulers, or jams, of Kutch were Jareja Rajputs who had entered the Kathiawar peninsular from Kutch and dispossessed the ancient family of Jathwas. Jam Raval, who was possibly the elder brother of the Jam of Kutch, founded Nawanagar about 1535. The great fort of Nawanagar was built by Jam Jasaji (d. 1814). The state became tributary to the Gaekwar family and, in the 19th century, also to the British. In 1948, the state was merged into Saurashtra.

RULERS
Vibhaji, VS1909-1951/1852-1894AD
Jaswant Singh, VS1951-1964/1894-1907AD

MONETARY SYSTEM
2 Trambiyo = 1 Dokda
3 Trambiyo = 1 Dhinglo
8 Dokda = 1 Kori

Early Types: Stylized imitations of the coins of Muzaffar III of Gujarat (1561-1573AD), dated AH978 (= 1570AD), were struck from the end of the 16th century until the early part of the reign of Vibhaji. These show a steady degradation of style over the nearly 300 years of issue, but no types can be dated to specific rulers. The former attribution of these coins to Ranmalji II (1820-1852AD) is incorrect. All are inscribed Sri Jamji, title of all rulers of Nawanagar.

Varieties in this series are the rule, not the exception. These include legend style, small marks in the field such as a crescent, Katar (dagger), etc., and weight ranges.

ORCHHA

State located in north-central India.

Orchha, the oldest and highest ranking of all the Bundela States, was founded by Rudra Pratap, a Garhwar Rajput, early in the 16th century. During the years of Mughal expansion, Orchha came under the supervision of Delhi. A few years later Jujhar Singh (1626-1635) rebelled but was defeated and dispossessed. Shah Jahan installed his brother as ruler in 1641. In the 18th century, as the Marathas took control of the region, only Orchha from among the Bundela States was not totally subjugated by the Peshwa. In the 19th century Orchha came under British protection.

The Orchha coinage was called Gaja Shahi because of the gaja or mace which was its symbol.

RULERS

PATIALA

A Cis-Sutlej State, located in the Punjab in northwest India. In the mid-18th century the Raja was given his title and mint right by Ahmad Shah Durrani of Afghanistan, whose coin he copied.

The maharaja of Patiala was also recognized as the leader of the Phulkean tribe. Unlike others, Patiala's Sikh rulers had never hesitated to seek British assistance at those times when they felt threatened by their co-religionist neighbors. It remained a state until the first Sikh war (1845-46) and then their independence became restricted until 1849 when the Punjab was annexed and the states were melded into the new province of British India.

In 1857, Patiala's forces were immediately made available on the side of the British.

PORBANDAR

State located on the Kathiawar peninsula in western India. The rulers, or ranas, of Porbandar were Jethwa Rajputs of ancient Rajput lineage. They are believed to have arrived from the north and settled the area as early as the 10th century. Their seat of government was transferred to Porbandar from Chaya, the ancient capital, in 1785. The Rana of Porbandar paid an annual tribute of 30,000 rupees to the Gaekwar of Baroda. In 1807 Porbandar acceded to British control, and in February 1948 became part of Saurashtra State. The coins of Porbandar are similar to the coins of Kutch and Navanagar and derive from a prototype struck in AH978/1570AD by Muzaffar Shah III of Gujarat. They have, in Nagari, the additional inscription, *Sri Rana*.

श्रीराणा

All are dated AH(9)78. They were struck until about 1890AD, and cannot be assigned to any specific ruler.

PRATABGARH

Pratabgarh

The rulers of Pratabgarh, a state located in northwest India, the maharawals, were Sesodia Rajputs who are believed to have migrated in 1553 from Mewar, where their ancestors once ruled. Arriving in the area, they seized control from the local Bhil chieftains, but it was not until the early 18th century that Maharawal Pratab Singh founded Pratabgarh town. Pratabgarh was tributary to Holkar until 1818 when, with the collapse of the Maratha Confederacy, the state came under British protection. The state was then managed through the Rajputana Agency until, in April 1948, it was merged into Rajasthan.

RADHANPUR

State located on the Kathiawar peninsula.

The nawabs of Radhanpur were Pathans of the Babi family who rose to high office in the service of Shah Jahan and Murad Bakhsh in Gujarat. Sometime in the late 17th or early 18th centuries, one of the family was appointed faujdar of Radhanpur and the surrounding area. After Aurangzeb's death, Kamal-ud-din Khan Babi seized the governorship of Ahmadabad, but this was relinquished in 1753 to the forces of the Peshwa of Poona and the Gaekwar of Baroda. Radhanpur, however, remained in Babi control as a Maratha Jagir until 1820 when the State came under British protection.

All silver coins of Radhanpur appear to be nazarana issues.

RATLAM

State located northwest of Indore in Madhya Pradesh.

The rajas of Ratlam were Rathor Rajputs, descendants of the younger branch of the Jodhpur ruling family. Ratlam became the premier Rajput state in western Malwa. The founder, Ratan Singh, received the territory as a grant from Shah Jahan in 1631. Before Maratha collapse some 15% of the state's annual revenue went to Sindhia as tribute. Under British protection it was supervised by the Central India Agency and in 1948 Ratlam became a district of Madhya Bharat.

REWA

State located in eastern north-central India.

The rulers of Rewa were Baghela Rajputs of the Solanki clan who probably migrated from Anhilwara Patan in Gujarat about the 11th century. Arriving in Bundelkhand, they carved out for themselves a substantial kingdom, which remained independent until 1597, when they were obliged to become Mughal tributaries under Akbar. With Mughal decline, Rewa began to move once more towards independence, this time under the nominal suzerainty of the Peshwa. In 1812, the raja of Rewa, Jai Singh Deo was coerced into a treaty with the British and, failing to observe its conditions, was forced to yield to British control in 1813-1814. In 1948 Rewa was merged into Vindhya Pradesh.

SAILANA

This small state in west-central India, of slightly over one hundred square miles, had once been part of Ratlam, but about 1709 it asserted its independence under the leadership of Pratab Singh, the second son of Chhatrasal. The town of Sailana was founded in 1730 by Jai Singh's successor and from that date the state was named after him. Due to its small size and vulnerability, Sailana was obliged to become tributary to Sindhia to ensure its survival. In 1819, this payment was limited to one-third of the state's revenues. Later, under agreements of 1840 and 1860, the tribute went to the British for the support of British Indian troops in the region. Barmawal was feudatory to Sailana.

SIRMUR

Sirmur Nahan

The ruling Rajput family of this Himalayan principality claimed descent from the Jaisalmir royal house and had ruled the region, located in north India, since the end of the 11th century. From 1803 to 1815, Sirmur came under Gurkha control but on their expulsion by the British during the Nepal War, the original Rajput family was restored to their ancestral dominions as a British feudatory.

NOTE: For earlier issues, see Gurkhas Kingdom.

SIROHI

Formerly Rajputana States Agency; merged in Rajasthan State, except for the tehsils (districts) of Abu Road and Dilawara which were merged with Bombay. Bordered on the north, northeast and west by Jodhpur, on the south by Palanpur, Danta and Idar; and on the east by Mewar.

While the ruling family claims descent from Prithwiraj, the Chauhan King of Delhi, the actual founder of the Sirohi house was one Deoraj, a 13th century figure who was the progenitor of the Deora clan of Rajputs. The present capital, Sirohi, was founded in 1425, about which time the Rana of Chitor is said to have taken refuge at Mount Abu from the army of Kutb-ud-din of Gujarat. The British entered by treaty in 1823, disallowed the claims of Jodhpur to Sirohi lands, ultimately bringing the Minas to submission and the straying thakurs back into line.

TONK

Tunk

State located partially in Rajputana and in central India. Tonk was founded in 1806 by Amir Khan (d. 1834), the Pathan Pindari leader who received the territory from Holkar. Amir Khan caused great havoc in Central India by his lightning raids into neighboring states. In 1817, he was forced into submission by the East India Company and remained under British control until India's independence. In March 1948, Tonk was incorporated into Rajasthan.

RULERS
Amir Khan, AH1213-1250/1798-1834AD
Wazir Muhammad Khan, AH1250-1281/1834-1864AD
Muhammad Ali Khan, AH1280-1284/1864-1867AD
Muhammad Ibrahim Ali Khan, AH1284-1349/1868-1930AD

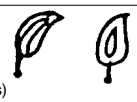
MINT MARKS

تونك

Tonk

NOTE: All coins with both AH and AD dates clearly readable command about a 50 per cent premium.

Flower (on all)



Leaf (several forms)

Beginning with the reign of Muhammad Ibrahim Ali Khan, most coins have both AD and AH date. Coins with both dates fully legible are worth about 20% more than listed prices. Coins with one date fully legible are worth prices shown. Coins with both dates off are of little value.

There are many minor and major variations of type, varying with location of date, orientation of leaf, arrangement of legend. Although these fall into easily distinguished patterns, they are strictly for the specialist and are omitted here.

The Tonk rupee was known as the "Chanwarshahi".

TRAVANCORE

State located in extreme southwest India. A mint was established in ME965/1789-1790AD.

The region of Travancore had a lengthy history before being annexed by the Vijayanagar kingdom. With Vijayanagar's defeat at the battle of Talikota in 1565, Travancore passed under Muslim

control until the late 18th century, when it emerged as a state in its own right under Raja Martanda Varma. At this time, the raja allied himself with British interests as a protection against the Muslim dynasty of Mysore. In 1795 the raja of Travancore officially accepted a subsidiary alliance with the East India Company and remained within the orbit of British influence from then until India's independence.

RULERS
Bala Rama Varma I, ME973-986/1798-1810AD
Rani Parvathi Bai, regent, ME990-1004/1815-1829AD

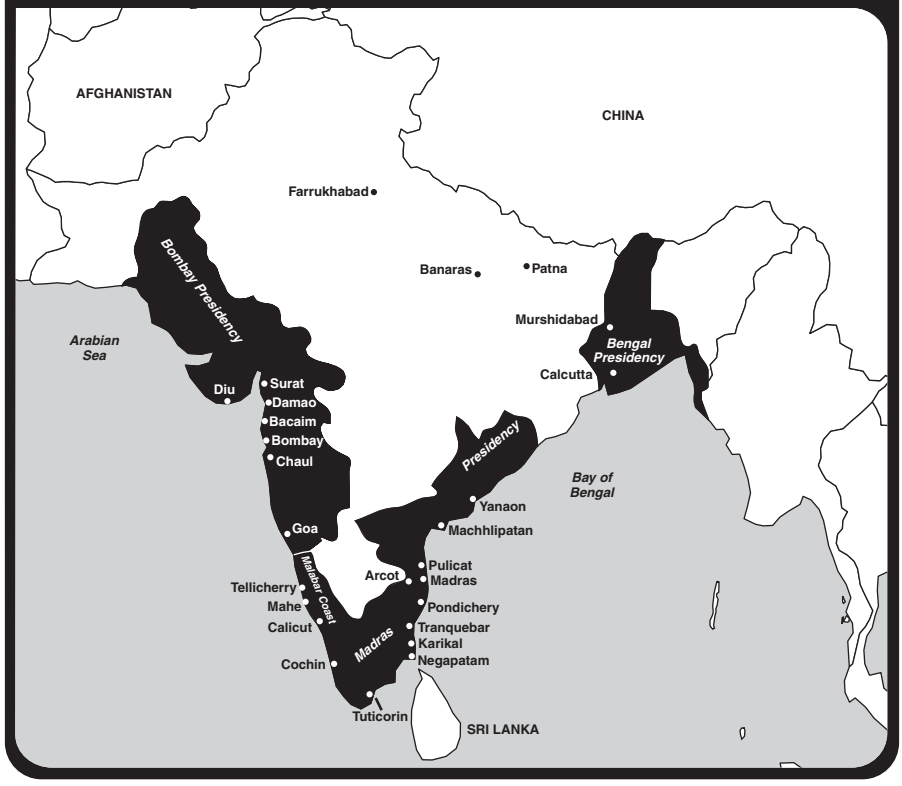
EUROPEAN INFLUENCES IN INDIA



Danish India or Tranquebar is a town and former Danish colony on the southeast coast of India. In Danish times, 1620-1845, it was a factory site and seaport operated by the Danish Asiatic Company. Tranquebar and the other Danish settlements in India were sold to the British East India Company in 1845.

INDIA-FRENCH

It was not until 1664, during the reign of Louis XIV, that the Compagnie des Indes Orientales was formed for the purpose of obtaining holdings on the subcontinent of India. Between 1666 and 1721, French settlements were established at Arcot, Mahe, Surat, Pondichery, Masulipatam, Karikal, Yanam, Murshidabad, Chandernagore, Balasore and Calicut. War with Britain reduced the French holdings to Chandernagore, Pondichery, Karikal, Yanam and Mahe. Chandernagore voted in 1949 to join India and became part of the Republic of India in 1950. Pondichery, Karikal, Yanam and Mahe formed the Pondichery union territory and joined the republic of India in 1954.

RULER

French, until 1945

Mint mark:
Crescent

A crescent moon mint mark is found to left of the regnal year for those struck at the Pondichery Mint. For listings of similar coins with lotus mint mark refer to India-British-Madras Presidency.

پرچري

Pondichery

A city south of Madras on the southeast coast which became the site of the French Mint from 1700 to 1841. Pondichery was settled by the French in 1683. It became their main Indian possession even though it was occupied by the Dutch in 1693-1698 and several times by the British from 1761-1816.

سورت

Surat

The French silver coins struck similar to late Mughal issues in two different periods. See also India-British, Bombay Presidency.

MONETARY SYSTEM

Cache Kas or Cash
Doudou = 4 Caches
Biche = 1 Pice
2 Royalins = 1 Fanon Pondichery
5 Heavy Fanons = 1 Rupee Mahe
64 Biches = 1 Rupee

NOTE: The undated coinage was struck ca. 1720 well into the early 19th century.

INDIA-PORTUGUESE

Vasco da Gama, the Portuguese explorer, first visited India in 1498. Portugal seized control of a number of islands and small enclaves on the west coast of India, and for the next hundred years enjoyed a monopoly on trade. With the arrival of powerful Dutch and English fleets in the first half of the 17th century, Portuguese power in the area declined until virtually all of India that remained under Portuguese control were the west coast enclaves of Goa, Damao and Diu. They were forcibly annexed by India in 1962.

RULERS

Portuguese, until 1961

IDENTIFICATION

The undated coppers are best identified by the shape of the coat of arms.

Maria I – Somewhat triangular shield (Baroque style)
Joao VI, as Regent: oval shield
Joao VI, as King: square shield

DENOMINATION

The denomination of most copper coins appears in numerals on the reverse, though 30 Reis is often given as "1/2 T", and 60 Reis as "T" (T = Tanga). The silver coins have the denomination in words, usually on the obverse until 1850, then on the reverse.

DAMAO

(Daman)

A city located 100 miles north of Bombay. It was captured by the Portuguese in 1559. A mint was opened in Damao in 1611. This mint continued in operation until 1854. While important to early Portuguese trade, Damao dwindled as time passed. It was annexed to India in 1962.

MONETARY SYSTEM

375 Bazacucos = 300 Reis
300 Reis = 1 Pardao
60 Reis = 1 Tanga

DIU

A district in Western India formerly belonging to Portugal. It is 170 miles northwest of Bombay on the Kathiawar peninsula. The Portuguese settled here and built a fort in 1535. A mint was opened in 1685 and was closed in 1859. As with Damao, the importance of Diu diminished with the passage of time. It was annexed to India in 1962.

GOA

Goa was the capitol of Portuguese India and is located 250 miles south of Bombay on the west coast of India. It was taken by Albuquerque in 1510. A mint was established immediately and operated until closed by the British in 1869. Later coins were struck at Calcutta and Bombay. Goa was annexed by India in 1962.

MONETARY SYSTEM
375 Bazarucos = 300 Reis
240 Reis = 1 Pardao
2 Xerafim = 1 Rupia

NOTE: The silver Xerafim was equal to the silver Pardao, but the gold Xerafim varied according to fluctuations in the gold/silver ratio.

INDIA - BRITISH

The civilization of India, which began about 2500 B.C., flourished under a succession of empires - notably those of the Mauryas, the Kushans, the Guptas, the Delhi Sultans and the Mughals – until undermined in the 18th and 19th centuries by European colonial powers.

The Portuguese were the first to arrive, off Calicut in May 1498. It wasn't until 1612, after the Portuguese and Spanish power had begun to wane, that the British East India Company established its initial settlement at Surat. Britain could not have chosen a more propitious time as the central girdle of petty states, and the southern Vijayanagar Empire were crumbling and ripe for foreign exploitation. By the end of the century, English traders were firmly established in Bombay, Madras, Calcutta and lesser places elsewhere, and Britain was implementing its announced policy to create such civil and military institutions as may be the foundation of secure English domination for all time'. By 1757, following the successful conclusion of a war of colonial rivalry with France during which the military victories of Robert Clive, a young officer with the British East India Company, made him a powerful man in India, the British were firmly settled in India not only as traders but as conquerors. During the next 60 years, the British East India Company acquired dominion over most of India by bribery and force, and governed it directly or through puppet princelings.

As a result of the Sepoy Mutiny of 1857-58, a large scale mutiny among Indian soldiers of the Bengal army, control of the government of India was transferred from the East India Company to the British Crown. At this point in world history, India was the brightest jewel in the British imperial diadem, but even then a movement for greater Indian representation in government presaged the Indian Empire's twilight hour less than a century later - it would pass into history on Aug. 15, 1947.

BRITISH COLONIAL

This section lists the coins of British India from the reign of William IV (1835) to the reign of George VI (1947). The issues are divided into two main parts:

1. Coins struck under the authority of the East India Company (E.I.C.) from 1835 until the trading monopoly of the E.I.C. was abolished in 1853. From August 2, 1858 the property and powers of the Company were transferred to the British Crown. From November 1, 1858 to November 1, 1862 the coins continued to bear the design and inscription of the Company.

2. Coins struck under the authority of the Crown (Regal issues) from 1862 until 1947.

The first regal issues bear the date 1862 and were struck with the date 1862 unchanged until 1874. From then onward all coins bear the year date.

The copper coins dated 1862 have been tentatively attributed by their size to the mint of issue. The silver coins dated 1862 have been attributed to various years of issue by their characteristic marks according to mint records.

In 1877 Queen Victoria was proclaimed Empress of India and the title of the obverse legend was changed accordingly.

For a detailed account of the work of the various mints and the numerous die varieties the general collector and specialist should refer to "*The Coins of the British Commonwealth of Nations to the End of the Reign of King George VI - 1952*", Part 4, India, Vol. 1 and 2, by F. Pridmore, Spink, 1980.

RULER
British until 1947

MINT MARKS

The coins of British India were struck at the following mints, indicated in the catalogue by either capital letters after the date when the actual letter appears on the coins or small letters in ( ) designating the mint of issue. Plain dates indicate Royal Mint strikes.

B-Bombay, 1835-1947, (dot on coin)
C or CM-Calcutta, 1835-1947, (no mint mark on coin)
H - Ralph Heaton & Sons, Birmingham (1857-1858)
I-Bombay, 1918-1919
L-Lahore, 1943-1945
M-Madras, 1869 (closed Sept. 1869)
P-Pretoria, South Africa, 1943-1944
W - J. Watt & Sons, Birmingham (1860)

MONETARY SYSTEM
3 Pies = 1 Pice (Paisa)
4 Pice = 1 Anna
16 Annas = 1 Rupee
15 Rupees = 1 Mohur

The transition from the coins of the Moslem monetary system began with the silver pattern Rupees of William IV, 1834, issued by the East India Company, with the value on the reverse, given in English, Bengali, Persian and Nagari characters. This coinage was struck for several years, as dated, except for the currency Rupee which was struck from 1835 to 1840, all dated 1835.

The portrait coins issued by the East India Company for Victoria show two different head designs on the obverse, which are called Type I and Type II. The coins with Type I head have a continuous obverse legend and were struck from 1840 to 1851. The coins with the Type II head have a divided obverse legend and were struck from 1850 (Calcutta) until 1862. The date on the coins remained unchanged: the Rupee, 1/2 Rupee and 1/4 Rupee are dated 1840, the 2 Annas and the Mohur are dated 1841. Both issues were struck at the Calcutta, Mumbai (Bombay) and Madras Mints. Numerous varieties exist in the rupee series of 1840. Noticable differences in the ribbon designs of the English vs. Indian obverses exist.

Type I coins have on the reverse a dot after the date, those of Type II have no dot, except for some rare 1/4 Rupees and 2 Annas. The latter are mules, struck from reverse dies of the preceding issue.

ENGRAVERS' INITIALS

The following initials appear on the obverse on the truncation:

F - William N. Forbes, Calcutta, 1836-1855
R.S. - Robert Saunders, Calcutta, 1826-1836
S Incuse (Type I)
WW raised or incuse (Type II)
WWS or SWW (Type II)
WWB raised (Type II)

On both issues, the "S" is the initial of Major, later Lt. Col. J. T. Smith, mintmaster at Madras from February 1840 to September 1855.

The B' which occurs only on Rupees of Type II, is the initial of Major, later Lt. Col. J. H. Bell (mintmaster at Madras, 1855-1859).

The initials WW which appear on all coins of Type II, are those of William Wyon, Chief Engraver of the Royal Mint, London, who prepared this obverse design in 1849.

The major reverse varieties occur on the Type I Rupees of all three mints. The first reverse has 19 berries in the wreath, the second reverse has 34 and 35 berries (Calcutta) and 35 berries (Bombay and Madras). There are several minor varieties of the first reverse, but these are not listed. Madras specimens of Type I with the 1st reverse also have a small, raised "V" on the lower part of the right ribbon bow.

REGAL COINAGE

1/12 ANNA

NOTE: 1/12 Anna dated 1862 were minted at Calcutta, Bombay, and Madres using Bust A. They may be attributed according to size Bust A was used on all issues except 1877 and subsequent Calcutta issues which used Bust B.

Distinguishing Features

BUST A - Front of dress has 4-1/3 panels with a flower at center on bottom panel.

BUST B - Front of dress has 4 panels with a flower at right on bottom panel.

CALCUTTA - Issues of 1874-76 are 17.5mm in diameter. From 1877 Bust B was used and the legend at lower right is distant from the bust. 1882-86 issues have a tiny incuse "C" on a bead of the inner circle below the date.

BOMBAY - Issues of 1874-76 are 18.0mm in diameter. From 1877 Bust A was used and the legend at lower right is close to the bust.

1/2 PICE

NOTE: The 1/2 Pice dated 1862 was struck at Indian Government Mints i.e. Calcutta and Madras. Tentative attribution to the mint of issue has been determined by their size.

Proofs and restrikes dated 1862 were struck from pattern dies with 4-3/4 panels, a different floral dress design on obverse and counter clockwise leaves on reverse.

1/4 ANNA

NOTE: The initial 1862 dated Calcutta 1/4 Annas were struck with a diameter of 26.2-26.3mm (Type A/I). With the opening of the new Calcutta copper mint in 1865 the 1/4 Annas were struck with a diameter of 25.3-25.4mm and a tiny raised v on the bottom center of the bust. Probably only a month or so later Calcutta began to strike coins with a new obverse and reverse (Type B/II). This type was used by Calcutta for the remainder of the Victorian period.

Distinguishing Features

BUST A - Front of dress has 4 panels with a single flower at right on bottom panel.

BUST B - Front of dress has 4 panels with flowers at left and right on bottom panel. Tiny raised v on bottom center of bust. Floral design of dress differs.

REVERSE I - Leaf below first and last digit of date.

REVERSE II - Leaf below center of date.

CALCUTTA - Issues from 1874 onward are Type B/II. Most 1879-1887 issues have a tiny incuse "C" on a bead of the inner circle below the center of the date.

BOMBAY - Issues of 1875-76 have Bust A and Rev. I (A/I) and from 1877 onward are Type B/I.

1/2 ANNA

NOTE: 1862 dated issues were struck at all three mints using Obverse A and Reverse I (A/I). They may be attributed according to size. Later 1862 dated Calcutta issues use Bust B and Reverse II (B/II).

Distinguishing Features

BUST A - Front of dress has 4-1/2 panels with no flowers on bottom incomplete panel.

BUST B - Front of dress has 4 panels with a small flower at upper left and large flower at right on bottom panel. Floral design of dress differs from Bust A. Tiny raised v on bottom left of bust.

BUST C - Front of dress has 4-3/4 panels with a single flower in center of bottom incomplete panel. An enlarged bust with floral design similar to Bust B.

REVERSE I - Slant top 1 in date and narrow spaced "ANNA".

REVERSE II - Flat top 1 in date and wide spaced "ANNA".

CALCUTTA - Issues from 1877 onward are Type C/II. 1877 Calcutta isues also have short, wide 7's in date. 1879 Calcutta issues have a tiny incuse "C" on a bead of the inner circle below the center of the date.

BOMBAY - Issues from 1877 onward are Type B/II. 1877 Bombay issues also have tall, narrow 7's in date. This type 7 appears on most Bombay issues but not on any denomination of the Calcutta Mint.

NOTE: The designations of Bust A, B and C have been changed to correspond with designations in "*Coins of the British Commonwealth of Nations Part 4, Vol. 2*" by F. Pridmore.

2 ANNAS

Distinguishing Features

BUST A - Front of dress has 4 panels. The bottom panel has 3 leaves at left and a small flower at upper right.

BUST B - Front of dress has 3-1/2 panels. The bottom incomplete panel has only 3 leaf tops.

REVERSE I - Large top flower; 2 large petals above the base of the top flower are long and curved downward.

REVERSE II - Small top flower; 2 large petals above the base of the top flower are short and horizontal.

CALCUTTA - Issues dated 1862-1878 are 15.3-15.4mm in diameter and have no mint mark. From 1879 the mint mark is a tiny incuse "C" on the whorl below the center of the bottom flower. The 1877 issue with a bead in the tip of the top flower is attributed to Calcutta based on its diameter of 15.4 mm.

BOMBAY - Issues dated 1862-1876 are 15.7-15.9mm in diameter and until 1876 have no mint mark. From 1876-1884 the mint mark is a raised dot above the bottom flower. From 1884 the mint mark is a small "B" incuse or raised on the stem of the top flower.

MADRAS - Issues dated 1862 are 16mm in diameter.

1/4 RUPEE

Distinguishing Features

Differences of the 3 busts and 2 reverses:

BUST A - The front of dress has 4 panels w/flower at right on bottom panel.

BUST B - Front of dress has 3-3/4 panels w/flower at center on incomplete bottom panel.

BUST C - Front of dress has 3 panels w/flower at left on bottom panel.

REVERSE I - The 2 large petals above the base of the top flower are long and curved downward; long stroke between "1/4".

Small Rupee, "ana" in Hindi.

REVERSE II - The 2 large petals above the base of the top flower are short and horizontal; short stroke between "1/4".

Small Rupee, "ana" in Persian

Reverse III: Large Rupee, "ana" in Persian.

CALCUTTA - Issues dated 1862-1878 have no mint mark. The diameter of the coins is 19.3-19.4mm and the milling is coarse. From 1879 the mint mark is a tiny incuse "C" on the whorl below the center of the bottom flower.

BOMBAY - Issues dated 1862, 1875 and 1876 have no mint mark. These have a diameter of 19.7-19.8mm and the milling is narrow. The coins dated 1874, 1877-1883 have as mint mark a small bead directly above the bottom flower. From 1884 the mint mark is a small "B" raised or incuse on the stem of the top flower.

MADRAS - Issues dated 1862 have a diameter of 19.9-20.0mm and coarse milling.

1/2 RUPEE

Distinguishing Features

BUST A - Front of dress has 4 panels w/a flower at left and right on bottom panel. Tiny raised v on bottom center of bust.

BUST B - Front of dress has 4-1/2 or 4-2/3 panels. The incomplete bottom panel has a flower at left of center.

BUST C - Front of dress similar to Bust B but with 4-3/4 panels floral design of dress differs.

Bust B

Bust C

REVERSE I - The top flower is open and the 2 large petals above the base of the top flower are short and horizontal, flat top 1 in date.

REVERSE II - The top flower is closed and the 2 large petals above the base of the top flower are long and curved downward, slant top 1 in date.

CALCUTTA - Issues have Bust A/Reverse I and Bust C/Reverse II, dated 1862-1878, and have no mint mark. From 1879 the mint mark is a small incuse "C" below the center of the bottom flower.

BOMBAY - Issues dated 1862 have no mint mark. From 1874-1884 the mint mark is a small dot above the center of the bottom flower. From 1885 the mint mark is a small "B" raised or incuse, on the stem of the top flower.

MADRAS - Issues dated 1862 have no mint mark and cannot be distinguished from the Bombay issues.

RUPEE

Distinguishing Features

NOTE: The Rupees dated 1862 were struck with the date unchanged until 1874. However, in 1863 Bombay Mint adopted a method of adding dots or beads to its dies to indicate the exact year of minting.

The beads occur in the following positions:

1. Below the base or whorl of the top flower.
2. Above or around the top of the bottom flower.
3. In both positions together.

The different busts are identified as follows:

BUST A - Front of dress has 3-3/4 panels with a small flower at left on bottom incomplete panel.

BUST B - Front of dress has 4-1/4 panels with a small flower right on bottom panel, floral design of dress differs.

BUST C - Similar to Bust A, but shorter at the bottom. Front of dress has 3-1/3 or 3-1/2 panels.

REVERSE I - The top of flower is open, flat top 1 in date.

REVERSE II - The top flower is closed, slant top 1 in date.

REVERSE IIa - Similar to Reverse II but flower buds above "E" of "ONE" and above right of second "E" of "RUPEE" have a "pineapple-like" pattern.

REVERSE III - The top flower is half open, flat 1 in date.

NOTE: The top flowers on reverse vary as illustrated below.

I II III

NOTE: In the listing of 1862 Rupees, the date column indicates the year in which the coins are believed to have been struck. The variety column lists the Obverse/reverse combination and the bead position. For example, A/I 0/0 means Bust A, Reverse I and no beads. A/II 1/2 means Bust A, Reverse II, and 1 bead at the top and 2 beads at the bottom.

Mintage for 1862 Rupees

CALCUTTA 269,427,222
Mumbai (Bombay) 408,003,034
Madras 29,481,923

NOTE: The B/II 0/0 coins are attributed to the mint of issues as follows:

CALCUTTA - 30.7mm or smaller, round pearls in crown arch.

BOMBAY -30.7-30.9mm, elongated pearls in crown arch. The scroll-like floral design of the dress is in flat relief and is retouched with incuse lines.

MADRAS - 30.9-31.0mm, elongated pearls in crown arch. The floral design is in high relief and is not retouched.

From 1874 onward the coins show the year date. The designs are similar to those on the 1862 Rupees but only Busts "A" and "C" and Reverse I and II were used.

CALCUTTA - Mint issues dated 1874-78 have no mint mark. From 1879 the mint mark is a small incuse "C" on the whorl below the center of the bottom lotus flower on the reverse. All Calcutta issues have Reverse I.

BOMBAY - Mint issues dated 1874-83 usually have as mint mark a small dot directly above the bottom lotus flower. From 1883 the mint mark is a small "B" raised or incuse on the stem of the top flower. Some issues dated 1874-84 have no mint mark but except for an 1883 issue have Reverse II. Issues dated 1874-76 have Reverse II only, those dated 1877-85 have both Reverses I and II, and from 1886 only Reverse I.

NOTE: There are reverse varieties in most of the following Rupees. Reverse II flowers are found in various sizes. Two bottom rosettes are found rotated, i.e., 1 petal up or down.

BENGAL PRESIDENCY

East India Company

(Until 1835)

In 1633 a group of 8 Englishmen obtained a permit to trade in Bengal from the Nawab of Orissa. Shortly thereafter trading factories were established at Balasore and Hariharpur. Although the Emperor Shah Jahan granted greater trading privileges to the East India Company in 1634, by 1642 the 2 original factories were abandoned.

In 1651, through an English surgeon named Broughton, a permit was acquired to trade at Bengal. Hugli was the first location, followed by Kasimbazar, Balasore and Patna (the last 3 in 1653). Calcutta became of increasing importance in this area and on December 20, 1699 Calcutta was declared a presidency and renamed Fort William. During these times there were many conflicts with the Nawab, both diplomatic and military, and the ultimate outcome was the intervention of Clive and the restoration of Calcutta as an important trading center.

During the earlier trading times in Bengal most of the monies used were imported rupees from the Madras factory. These were primarily of the Arcot type. After Clive's victory one of the concessions in the peace treaty was the right to make Mughal type coinage. The Nawab gave specific details as to what form the coinage should take.

In 1765 Emperor Shah Alam gave the East India Company possessions in Bengal, Orissa and Bihar. This made the company nominally responsible only to the Emperor.

In 1777 the "Frozen Year 19" (of Shah Alam) rupees were made at Calcutta and were continued until 1835. The Arcot rupees were discontinued at Calcutta about 1777.

BOMBAY PRESIDENCY

Following a naval victory over the Portuguese on December 24, 1612 negotiations were started that developed into the opening of the first East India Company factory in Surat in 1613. Silver coins for the New World as well as various other foreign coins were used in early trade. Within the decade the Mughal mint at Surat was melting all of these foreign coins and re-minting them as various denominations of Mughal coinage.

Bombay became an English holding as part of the dowry of Catherine of Braganza, Princess of Portugal when she was betrothed to Charles II of England. Also included in the dowry was Tangier and $500,000. With this acquisition the trading center of the Indian West Coast moved from Surat to Bombay.

Possession of Bombay Island took place on February 8, 1665 and by 1672 the East India Company had a mint in Bombay to serve their trading interests. European designed coins were struck here until 1717. Experimental issues of Mughal style rupees with regnal years pertaining to the reigns of James II and William and Mary were made in 1693-94.

From 1717 to 1778 the Mughal style Bombay rupee was the principal coin of the West India trade, although bulk foreign coins were used for striking rupees at Surat.

After the East India Company took over the city of Surat in 1800 they slowed the mint production and finally transferred all activity to Bombay in 1815.

SILVER COINAGE

Privy Marks

Mint privy marks on dump issues often were intended to be "secret" (=privy marks), indicating changes in standards as well as mint of origin. The following chart is derived from IV Pridmore.

Privy marks involve the 3 diamonds and 4 dots in center line of obverse.

1. Surat 1800-1815
2. Mumbai (Bombay) 1801-02
3. Mumbai (Bombay) 1802
4.* Mumbai (Bombay) 1803-24
4b. Mumbai (Bombay) 1803-24
5.* Mumbai (Bombay) 1825-31
5b. Mumbai (Bombay)1825-31
6. Mumbai (Bombay) 1800-24
7. Mumbai (Bombay) 1825
8. On rev. Mumbai (Bombay) 1825-31
9. Unknown

***NOTE:** Crown also may be inverted.

MADRAS PRESIDENCY

English trade was begun on the east coast of India in 1611. The first factory was at Mazulipatam and was maintained intermittently until modern times.

Madras was founded in 1639 and Fort St. George was made the chief factory on the east coast in 1641. A mint was established at Fort St. George where coins of the style of Vijayanagar were struck.

The Madras mint began minting copper coins after the renovation. In 1689 silver fanams were authorized to be struck by the new Board of Directors.

In 1692 the Mughal Emperor Aurangzeb gave permission for Mughal type rupees to be struck at Madras. These circulated locally and were also sent to Bengal. The chief competition for the Madras coins were the Arcot rupees. Some of the bulk coins from Madras were sent to the Nawabs mint to be made into Arcot rupees. In 1742 the East India Company applied for and received permission to make their own Arcot rupees. Coining operations ceased in Madras in 1869.

MONETARY SYSTEM
1 Dudu = 10 Cash
8 Dudu = 1 Fanam
36 Fanam = 1 Pagoda (1688-1802)
42 Fanam = 1 Pagoda (1802-1817)
45 Fanam = 1 Pagoda (1817-1835)
3-1/2 Rupees = 1 Pagoda

BRITISH COLONY

This section lists the coins of British India from the reign of William IV (1835) to the reign of George VI (1947). The issues are divided into two main parts:

1. Coins struck under the authority of the East India Company (E.I.C.) from 1835 until the trading monopoly of the E.I.C. was abolished in 1853. From August 2, 1858 the property and powers of the Company were transferred to the British Crown. From November 1, 1858 to November 1, 1862 the coins continued to bear the design and inscription of the Company.

2. Coins struck under the authority of the Crown (Regal issues) from 1862 until 1947.

The first regal issues bear the date 1862 and were struck with the date 1862 unchanged until 1874. From then onward all coins bear the year date.

The copper coins dated 1862 have been tentatively attributed by their size to the mint of issue. The silver coins dated 1862 have been attributed to various years of issue by their characteristic marks according to mint records.

In 1877 Queen Victoria was proclaimed Empress of India and the title of the obverse legend was changed accordingly.

For a detailed account of the work of the various mints and the numerous die varieties the general collector and specialist should refer to "The Coins of the British Commonwealth of Nations to the end of the reign of King George VI - 1952", Part 4, India, Vol. 1 and 2, by F. Pridmore, Spink, 1980.

RULERS
British until 1947

MINT MARKS

The coins of British India were struck at the following mints, indicated in the catalogue by either capital letters after the date when the actual letter appears on the coins or small letters in ( ) designating the mint of issue. Plain dates indicate Royal Mint strikes.

B-Bombay, 1835-1947
C or CM-Calcutta, 1835-1947
H - Ralph Heaton & Sons, Birmingham
¬¬(1857-1858)
I-Bombay, 1918-1919
L-Lahore, 1943-1945
M-Madras, 1869 (closed Sept. 1869)
P-Pretoria, South Africa, 1943-1944
W - J. Watt & Sons, Birmingham (1860)

In 1947 British rule came to an end and India was divided into two self-governing countries, India and Pakistan. In 1971 Bangladesh seceded from Pakistan. All are now independent republics and although they are still members of the British Commonwealth of Nations, their coinages do not belong to the British India series.

MONETARY SYSTEM
3 Pies = 1 Pice (Paisa)
4 Pice = 1 Anna
16 Annas = 1 Rupee
15 Rupees = 1 Mohur

The transition from the coins of the Moslem monetary system began with the silver pattern Rupees of William IV, 1834, issued by the East India Company, with the value on the reverse, given in English, Bengali, Persian and Nagari characters. This coinage was struck for several years, as dated, except for the currency Rupee which was struck from 1835 to 1840, all dated 1835.

The portrait coins issued by the East India Company for Victoria show two different head designs on the obverse, which are called Type I and Type II. The coins with Type I head have a continuous obverse legend and were struck from 1840 to 1851. The coins with the Type II head have a divided obverse legend and were struck from 1850 (Calcutta) until 1862. The date on the coins remained unchanged: the Rupee, 1/2 Rupee and 1/4 Rupee are dated 1840, the 2 Annas and the Mohur are dated 1841. Both issues were struck at the Calcutta, Bombay and Madras Mints. Numerous varieties exist in the rupee series of 1840. Noticable differences in the ribbon designs of the English vs. Indian obverses exist.

Type I coins have on the reverse a dot after the date, those of Type II have no dot, except for some rare ¼ Rupees and 2 Annas. The latter are mules, struck from reverse dies of the preceding issue.

ENGRAVERS' INITIALS

The following initials appear on the obverse on the truncation:
F - William N. Forbes, Calcutta, 1836-1855
R.S. - Robert Saunders, Calcutta, 1826-1836
S Incuse (Type I)
WW raised or incuse (Type II)
WWS or SWW (Type II)
WWB raised (Type II)

The initials WW which appear on all coins of Type II, are those of William Wyon, Chief Engraver of the Royal Mint, London, who prepared this obverse design in 1849.

Proof and Proof-like restrikes

Original proofs are similar to early English Specimen strikes with wire edges and matte finish busts, arms, etc. Restrikes of most of the coins minted from the period 1835 were regularly supplied until this practice was discontinued on July 1, 1970.

Early proof restrikes are found with slight hairlining from polishing of the old dies. Bust, field, arms etc. are of even smoothness.

Modern proof-like (P/L) restrikes are usually heavily hairlined from excessive polishing of the old dies and have a glassy, varnished or proof-like appearance. Many are common while some are quite scarce including some unusual mulings.

HAMMERED COINAGE

The Ionian Islands, situated in the Ionian Sea to the west of Greece, is the collective name for the islands of Corfu, Cephalonia, Zante, Santa Maura, Ithaca, Cythera and Paxo, with their minor dependencies. Before Britain acquired the islands, 1809-14, they were at various times subject to the authority of Venice, France, Russia and Turkey. They remained under British control until their cession to Greece on March 29, 1864.

BRITISH ADMINISTRATION

COUNTERMARKED COINAGE

(1809-1863)

The British military forces under General Campbell were headquartered on the island of Zacynthos (Zante). A shortage of small silver coinage resulted in the countermarking of circulated coins of the Two Sicilies of 10 and 20 Grani denominations and worn Spanish and Spanish Colonial silver 1 and 2 reales coinage.

The Type I countermarks of 1813 were raised numerals 25, 30, 50 and 60 in rectangular indent. These being easily counterfeited lead to the 1814 Type II oval indent with a crudely executed bust of King George III over raised numerals. The Type II countermark was applied to existing Type I countermarked coinage and other coins found in circulation. No single countermarked Type I pieces are known to have survived.

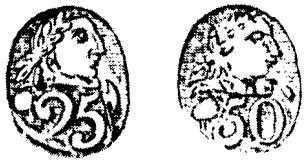
MONETARY SYSTEM

40 Paras = 1 Piastre
220 Paras = 1 Spanish Dollar (8 Reales)

Type I

Raised 25, 30, 50, or 60 in rectanglar indent.

Type II



Portrait of King George III over 25, 30, 50 or 60 in oval indent.

KM# 18 25 PARAS

ND(1814)	ND Rare	—	—	—	—	—

Note: One unusual piece exists with only one countermark on a French coin of Louis XIV. It is considered by some experts to be a contemporary counterfeit, since the authorization for these coins mentions only Spanish and Two Sicilies coinage. However, it may be that the islanders were permitted to present any silver coins in their possession for countermarking.

IRAN

The Islamic Republic of Iran is located between the Caspian Sea and the Persian Gulf in southwestern Asia. Iran (historically known as Persia until 1931AD) is one of the world's most ancient and resilient nations. Strategically astride the lower land gate to Asia, it has been conqueror and conquered, sovereign nation and vassal state, ever emerging from its periods of glory or travail with its culture and political individuality intact. Iran (Persia) was a powerful empire under Cyrus the Great (600-529 B.C.), its borders extending from the Indus to the Nile. It has also been conquered by the predatory empires of antique and recent times - Assyrian, Medean, Macedonian, Seljuq, Turk, Mongol - and more recently been coveted by Russia, the Third Reich and Great Britain. Revolts against the absolute power of the Persian shahs resulted in the establishment of a constitutional monarchy in1906.

COIN DATING

Iranian coins were dated according to the Moslem lunar calendar until March 21, 1925 (AD), when dating was switched to a new calendar based on the solar year, indicated by the notation SH. The monarchial calender system was adopted in 1976 = MS2535 and was abandoned in 1978 = MS2537. The previously used solar year calendar was restored at that time.

MONETARY SYSTEM

1798-1825
(AH1212-1241)
1250 Dinars = 1 Riyal
8 Riyals = 1 Toman

1825-1931
(AH1241-1344, SH1304-09)
50 Dinars = 1 Shahi
20 Shahis = 1 Kran (Qiran)
10 Krans = 1 Toman

NOTE: From AD1830-34 (AH1245-50) the gold Toman was known as a 'Keshwarsetan'.

Copper Hammered Coinage

During the 19th century, copper coins (falus, flus) were issued at some 40 or more local mints, each of which coined falus for local use only. Copper coins did not circulate generally, but were restricted to the city of their origin and its immediate environs. The local mintmaster, often in collaboration with the local governor, determined the type, design, and weight of the coinage, and regulated its circulation.

In theory, copper coins were recalled and changed about every year, with a substantial fee payable to the mintmaster for the exchange of old coin for new. To discourage further use the old coin was either demonetized or tariffed at a lower value, usually about half its original.

In order to facilitate the recognition of new and old coin, the type was changed annually, the type being the obverse pictorial design, so that illiterate shopkeepers could tell the difference and not be deceived by obsolete coins. However, after a number of years, the same types would be reinstated for another year. In practice, the system worked more informally, and surviving coins show that at some mints, identical types were struck for several years running and were not recalled annually.

The metrology of the copper Falus is uncertain. While it seems that Falus were intended to follow an assigned weight standard, great tolerance was permitted. The weight standard was frequently changed (or the mintmaster issued lighter coins and pocketed the difference), and each mint city maintained its own standard and copper currency policies.

As a result of the frequent recoinage of copper and its frequent demonetization, copper coins were not hoarded or saved, and are consequently quite scarce today. Annual change meant that each mint had a multiplicity of types and varieties, most of which are uncommon today. The following listings are not an attempt at completeness, but give a representative selection of the products of each mint.

IMPORTANT: Most types were used at many different mints. The type can therefore not be used to attribute a coin to the mint of its issue. The ONLY certain way of attributing the coin is to read the mint name on the reverse. Well struck copper falus with clear mintname and date are worth a premium.

Silver and Gold Hammered Coinage

The precious metal monetary system of Qajar Persia prior to the reforms of 1878 was the direct descendant of the Mongol system introduced by Ghazan Mahmud in 1297AD, and was the last example of a medieval Islamic coinage. It is not a modern system, and cannot be understood as such. It is not possible to list types, dates, and mints as for other countries, both because of the nature of the coinage, and because very little research has been done on the series. The following comments should help elucidate its nature.

STANDARDS: The weight of the primary silver and gold coins was set by law and was expressed in terms of the Mesqal (about 4.61 g) and the Nokhod (24 Nokhod = 1 Mesqal). The primary silver coin was the Rupee from AH1211-1212, the Riyal from AH1212-1241, and the Gheran from AH1241-1344. The standard gold coin was the Toman. Currently the price of gold is quoted in Mesqals.

DENOMINATIONS: In addition to the primary denominations, noted in the last paragraph, fractional pieces were coined, valued at one-eighth, one-fourth, and one-half the primary denomination, usually in much smaller quantities. These were ordinarily struck from the same dies as the larger pieces, sometimes on broad, thin flans, sometimes on thick, dumpy flans. On the smaller coins, the denomination can best be determined only by weighing the coin. The denomination is almost never expressed on the coin!

DEVALUATIONS: From time to time, the standard for silver and gold was reduced, and the old coin recalled and replaced with lighter coin, the difference going to the government coffers. The effect was that of a devaluation of the primary silver and gold coins, or inversely regarded, an increase in the price of silver and gold. The durations of each standard varied from about 2 to 20 years. The standards are given for each ruler, as the denomination can only be determined when the standard is known.

LIGHTWEIGHT AND ALLOYED PIECES: Most of the smaller denomination coins were issued at lighter weights than those prescribed by law, with the difference going to the pockets of the mintmasters. Other mints, notably Hamadan, added excessive amounts of alloy to the coins, and some mintmasters lost their heads as a result. Discrepancies in weight of as much as 15 percent and more are observed, with the result that it is often quite impossible to determine the denomination of a coin!

OVERSIZE COINS: Occasionally multiples of the primary denominations were produced, usually on special occasions, for presentation by the Shah to his favorites. These coins' did not circulate (except as bullion), and were usually worn as ornaments. They were the NCLT's' of their day.

MINTS AND EPITHETS: Qajar coinage was struck at 34 mints (plus at least a dozen others striking only copper Falus), which are listed previously, with drawings of the mintnames in Persian, as they appear on the coins. However, the Persian script admits of infinite variation and stylistic whimsy, so the forms given are only guides, and not absolute. Only a knowledge of the script will assure correct reading. In addition to the city name, most mintnames were given identifying epithets, which occasionally appear in lieu of the mint name, particularly at Iravan and Mashhad.

TYPES: There were no types in the modern sense, but the arrangement of the legends and the ornamental borders were frequently changed. These changes do not coincide with changes in standards, and cannot be used to determine the mint, which must be found by actually reading the reverse inscriptions.

ARRANGEMENT: The following listings are arranged first by ruler, with various standards explained. Then, the coins are listed by denomination within each reign. For each denomination, one or more pieces, when available, are illustrated, with the mint and date noted beneath each photo. For each type, a date range is given, but this range indicates the years during which the particular type was current, and does not imply that every year of the interval is known on actual coins. Because dates were carelessly engraved, and old dies were used until they wore out or broke, we occasionally find coins of a particular type dated before or after the indicated interval. Such coins command no premium. No attempt has been made to determine which mints actually exist for which types.

Fath Ali Shah

AH1212-1250 / 1797-1834AD

Fath Ali Khan succeeded his uncle, Agha Muhammad Shah, upon the latter's death on 16 June 1797, striking coins with the nickname Baba Khan. His formal enthronement took place three months later, on 15 or 16 September 1797, at which time he received the name Fath Ali Shah. His coin types are distinguished both by inscription, calligraphy, and weight standard. As the silver and gold weight standards were not altered simultaneously, the type sequences for silver and gold differ.

Note: All coins of this and succeeding reigns for hammered coinage bear the mint & date on the reverse, the mint usually with its distinguishing epithet. Only the obverse is noted in the type descriptions.

Coinage Standards of Fath Ali Shah

NOTE: Prices for silver coins are for average strikes, with some weakness or unevenness. Poorly struck coins are worth less, well-struck and well-centered coins can be worth from 25-100% more, depending on eye appeal and ornateness of design. Gold coins are generally better struck, but really attractive strikes or fancy designs also command a premium.

NOTE: Coins without legible date are worth about half the price of the cheapest date of the mint & type. Coins without legible mint are of little value. This and the previous note apply to coins of the later rulers Muhammad Shah and Nasir al-Din Shah as well as those of Fath Ali Shah.

Silver Types:

CO (Coronation Type). Obverse, double legend: *Amadeh az Fath-e 'Ali sekke be-zar-e shahi,* "From Fath Ali came the die to the royal precious metals." Standard for the rial (=1250 dinars) was 11.52 g.

A. Obverse, name of ruler with title *al-sultan*. Standard for the rial was 10.36 g.

B. Obverse, name of ruler with the expanded title *al-sultan, ibn al-sulan*, "Sultan, son of the sultan." Plain backgrounds with rather thick calligraphy. Same standard as Type A.

C. Obverse, as Type B, but with floriated backgrounds and finer calligraphy. Same standard as Types A and B.

D. Obverse, as Type C, similar backgrounds & calligraphy, but standard reduced to 9.21 g for the rial.

E. Obverse, new form of the royal protocol, *Fath 'Ali Shah Qajar Khusro-ve Sahebqeran*, "Fath Ali Shah Qajar, Caesar, Sahebqeran (i.e., possessor of an auspicious conjunction)." The rial was abandoned except at Mashhad and replaced by a qiran (kran) of 1000 dinars weighing 6.91 g.

F. Obverse, as Type E but the final portion of the protocol is *Khosro-ve Keshvarsetan*, "World-conquering Caesar." Same standard as type, with which it is contemporary (1246-1250). All Type F silver coins are probably mules with obverse dies intended for the gold.There are also a number of local types, which have not been assigned type letters and are listed following the regular imperial types.

Gold Types:

R. Same as silver Type CO (Coronation Type). Standard for the toman (=10,000 dinars) is 6.14 g.

S. Inscriptions as Type A (Type S.1) or as Type B (Type S.2) same standard as Type R.

T. Inscriptions as Type B (Type T.1) or as Type C (Type T.2), based on a toman of 5.76 g. (No examples of Type T.2 with mint & date are confirmed at the present time.)

U. Inscriptions as Type C, based on a toman of 5.37 g.

V. Inscriptions as Type C, based on a toman of 4.80 g.

W. Inscriptions as Type C or D, based on a toman of 4.61 g (one mithqal weight).

X. Inscriptions as Type E (*sahebqeran* type), based on a toman of 4.61 g.

Y. Inscriptions as Type F (*keshvarsetan* type), based on a toman of 3.45 g.

Note: Reported, not confirmed

Muhammad Shah
AH1250-1264 / 1834-1848AD

Silver Types

All purely inscriptional coins of Muhammad Shah share a common obverse legend, *Mohammad Shahansha-e Anbiyja*, "Muhammad, King of the Prophets," a word-play on the name of the ruler. All have mint & date on reverse, as in previous reigns. The types differ only in their weight standards:

A. Based on a kran of 6.91 g.
B. Based on a kran of 6.33 g.
C. Based on a kran of 5.76 g.
D. Based on a kran of 5.37 g.
E. Obverse: Lion & sun within wreath. Reverse: The normal Muhammad Shah legend, together with mint & date, all within a square. Same standards as type D, with which it was contemporary.

Gold Types

R. Based on a toman of 3.84 g.
S. Based on a toman of 3.45 g.

Note: Countermarks appear on these coins ranging from AH1246-1249; Anonymous type, could be an issue of either Sultan Ali Shah or Muhammad Shah

Nasir al-Din Shah

AH1264-1313 / 1848-1896AD

The hammered silver coinage of this reign comprises two standards, one based on a kran of 5.37 g, the second based on a kran of 4.99 g. The first was inherited from the previous reign and maintained for the kran until AH1273 or 1274 (AH1276 at Tabriz). The second standard was introduced for the half kran as early as AH1269 or 1270, and seems to have been in general use for the half kran as early as AH1269 or 1270, and seems to have been in general use for the half kran by AH1271. Unfortunately, not enough information is currently available to separate all issues. For that reason, the two standards are lumped together as a single type, but will be separated in a future edition of this catalog. The 5.37 g standard will be types KM#821-824, those on the 4.99 g standard will be KM#821a-824a.

The eighth kran was intended largely for ceremonial purposes, and varies considerably in weight. It is the ancestor of the Shahi Sefid of the machine-struck period.

Machine-struck coinage was introduced in AH1293 and became general by AH1296. The latest known hammered coins are dated AH1297. All of the provincial markets were closed when hammered coinage ceased.

All of Nasir al-Din's hammered gold was struck to the 3.45 g toman standard.

All normal hammered silver and gold coinage of this reign bears on the obverse the inscription *al-sultan ibn al-sultan Nasir al-Din Shah Qajar*, occasionally somewhat shortened. The reverse bears the mint & the date, though the date occasionally appears on the obverse or on both sides.

There is great variety of design for both obverse and reverse during this reign, with many attractive and elegant cartouches and calligraphic styles. The more attractive and ornate designs command a significant premium over listed prices, from 25% to at least 200%, depending on attractiveness and rarity.

KRAN STANDARD

AH1293-1344, SH1304-1309,
1876-1931AD

50 Dinars = 1 Shahi
1000 Dinars = 20 Shahis = 1 Kran (Qiron)
10 Krans = 1 Toman

NOTE: Dated reverse dies lacking the ruler's name were not discarded at the end of a reign (especially from Nasir al-Din to Muzaffar al-Din), but remained in use until broken or worn out. Sometimes the old date was scratched out or changed, but often the die was used with the old date unaltered. Some dies with date below wreath retained the old date but had the new date engraved among the lion's legs.

The Republic of Iraq, historically known as Mesopotamia, is located in the Near East and is bordered by Kuwait, Iran, Turkey, Syria, Jordan and Saudi Arabia. Capital: Baghdad.

Mesopotamia was the site of a number of flourishing civilizations of antiquity - Sumeria, Assyria, Babylonia, Parthia, Persia and the Biblical cities of Ur, Ninevehand and Babylon. Desired because of its favored location, which embraced the fertile alluvial plains of the Tigris and Euphrates Rivers, Mesopotamia - 'land between the rivers'- was conquered by Cyrus the Great of Persia, Alexander of Macedonia and by Arabs who made the legendary city of Baghdad the capital of the ruling caliphate. Suleiman the Magnificent conquered Mesopotamia for Turkey in1534, and it formed part of the Ottoman Empire until 1623, and from 1638 to 1917. Great Britain, given a League of Nations mandate over the territory in 1920, recognized Iraq as a kingdom in 1922. Iraq became an independent constitutional monarchy presided over by the Hashemite family, direct descendants of the prophet Mohammed, in 1932. In 1958, the army-led revolution of July 14 overthrew the monarchy and proclaimed a republic.

Ireland, the island located in the Atlantic Ocean west of Great Britain, was settled by a race of tall, red-haired Celts from Gaul about 400 BC. They assimilated the native Erainn and Picts and established a Gaelic civilization. After the arrival of St. Patrick in 432 AD, Ireland evolved into a center of Latin learning, which sent missionaries to Europe and possibly North America. In 1154, Pope Adrian IV gave all of Ireland to English King Henry II to administer as a Papal fief. Because of the enactment of anti-Catholic laws and the awarding of vast tracts of Irish land to Protestant absentee landowners, English control did not become reasonably absolute until 1800 when England and Ireland became the "United Kingdom of Great Britain and Ireland". Religious freedom was restored to the Irish in 1829, but agitation for political autonomy continued until the Irish Free State was established as a Dominion on Dec. 6, 1921 while Northern Ireland remained under the British rule.

RULER
British to 1921

Isles de France et de Bourbon, (later called Mauritius and Reunion) are located in the Indian Ocean about 500 miles east of Madagascar, were administered by France as a single colony. They utilized a common currency issue. Ownership of the isle passed to Great Britain in 1814. Isle de Bourbon, renamed Reunion in 1793, remained a French possession and is now an Overseas Department.

The Isle of Man, a dependency of the British Crown located in the Irish Sea equidistant from Ireland, Scotland and England. Capital: Douglas. Agriculture, dairy farming, fishing and tourism are the chief industries.

The prevalence of prehistoric artifacts and monuments on the island give evidence that its' mild, almost sub-tropical climate was enjoyed by mankind before the dawn of history. Vikings came to the Isle of Man during the 9th century and remained until ejected by the Scottish in 1266. The island came under the protection of the British Crown in 1288, and in 1406 was granted, in perpetuity, to the earls of Derby, from whom it was inherited, 1736, by the Duke of Atholl. The British Crown purchased the rights and title in 1765; the remaining privileges of the Atholl family were transferred to the crown in 1829. The Isle of Man is ruled by its own legislative council and the House of Keys, one of the oldest legislative assemblies in the world. Acts of Parliament passed in London do not affect the island unless it is specifically mentioned.

a map of the ***ITALIAN STATES***

CISALPINE REPUBLIC

Transpadane Republic, a revolutionary state founded in northern Italy by Napoleon, came into being at Milan, Lombardy, in July 1797. It was subsequently enlarged by the addition of the Cispadine Republic and territory from the Venetian hinterlands and the Swiss Cantons of the Valtellina. It collapsed upon the conquest of Italy by an Austro-Russian army, but was restored by Napoleon in 1800.

EMILIA

Emilia-Romagna

A division of northern Italy encompassing about 8,000 square miles, lying south of the Po River and north of Tuscany. It comprised the provinces of Bologna, Ferrara, Forli, Modena, Parma, Piacenza, Ravena and Reggio nell' Emilia. From 1797 until 1814, the region was incorporated into the various entities created by Napoleon, culminating in the Kingdom of Napoleon. The Papacy regained control of most of the territory in 1815. As a result of the wars in the movement towards the reunification of the entire country, Vittorio Emanuele II of Sardinia-Piedmont was elected king of all of Italy in 1859. A provisional coinage was struck for Emilia during 1859-61 in anticipation of a single currency system for Italy. Some of the minor coins were struck in Bologna in 1859 and 1860 using Sardinia-Piedmont designs of 1826 and retaining that early date, as well as the names and titles of King Carlo Felice, who died in 1831.

RULER
Vittorio Emanuele II of Sardinia, King elect 1859-1861

GENOA

A seaport in Liguria, Genoa was a dominant republic and colonial power in the Middle Ages. In 1798 Napoleon remodeled it into the Ligurian Republic, and in 1805 it was incorporated in the Kingdom of Napoleon. Following a brief restoration of the republic, it was absorbed by the Kingdom of Sardinia in 1815.

MINT MARKS

During the occupation by the French forces regular French coins, 1/2, 1, 2, 5, 20 and 40 Francs were struck between 1813 and 1814 with the mint mark C.L.

After Sardinia absorbed Genoa in 1815, regular Sardinian coins were struck until 1860 with a fouled anchor mint mark.

LOMBARDY-VENETIA

Comprised the northern Italian duchies of Milan and Mantua and the Venetian Republic; all these were absorbed into the Kingdom of Napoleon in 1805. After Napoleon's fall they were awarded to Austria and incorporated into the Hapsburg monarchy as the Kingdom of Lombardy-Venetia.

The Lombard campaign of 1859 restored rule under the Kingdom of Italy for Lombard in 1859 and Venetia in1866.

RULERS
French, until 1814
Austrian, until 1814-48, 1849-59
Italian, until 1946

MINT MARKS
A, W - Vienna
B - Kremnitz
M - Milan
S - Schmollnitz
V - Venice

LUCCA

Luca, Lucensis
Lucca and Piombino

A town in Tuscany and the residence of a marquis, was nominally a fief but managed to maintain a *de facto* independence until awarded by Napoleon to his sister Elisa in 1805. In 1814 it was occupied by the Neapolitans, from 1817 to 1847 it was a duchy of the queen of Etruria, after which it became a division of Tuscany.

Principality, 1805-1814
Lucca, Duchy, 1817-1847

RULERS
Felix Bacciocchi and Elisa (Bonaparte), 1805-1814
Maria Luisa di Borbone, Duchess, 1817-1824
Carlo Lodovico di Borbone, Duke, 1824-1847

MANTUA

Mantova
Marquisate and Duchy

Originally of Etruscan foundation, Mantua is situated about 22 miles (37 kilometers) south-southwest of Verona and 36 miles (60 kilometers) east of Cremona. The city was famous in antiquity as the birthplace of Virgil and was made part of the kingdom of the Lombards in 601. Charlemagne made Mantua the seat of a countship, which was combined with the office of the local bishop by the later 9th century. Secular counts ruled Mantua again until the hereditary line died out in 1115 and Mantua became a republic. Elected administrators continually fell under imperial influence and the city was contested by the rival factions of Guelfs and Ghibellines. The family of Bonaccolsi controlled affairs in Mantua for about half a century before they were dispossessed by Luigi Gonzaga in 1328. He founded the dynasty that would rule Mantua and its considerable territory until the early 18th century.

At first, the Gonzagas were content with the title of captain, but the head of the family was named Vicar of the Empire in 1365. Mantua was raised to the status of Marquisate in 1432, but in 1530 the marchese was made duke. The city was sacked by imperial forces in 1630 and during the War of the Spanish Succession. The last duke was forced to allow French troops to occupy Mantua in 1703. The French left Italy in 1707 and the emperor declared the action by the duke to have allowed them entrance earlier as a felony. Invoking his right after the death of the last duke in 1708, the emperor claimed the fief reverted to the crown. It remained an imperial possession until Napoleon besieged and captured the city in 1797. The city was besieged again in 1799 by Austrian and Russian forces, who succeeded in retaking it. Mantua was then returned to Austria in 1814. During the general insurrection against Austrian rule in northern Italy in 1848, the army of Sardinia-Piedmont under King Carlo Alberto attempted to besiege Mantua. The Austrian army was led by the very able General Radetzky and successfully resisted the Italians. Coins struck in Mantua during the siege have GM on them, most probably referring to the Guarnigione (garrison) of Mantual. The city eventually became part of united Italy in 1866.

MILAN

(Milano)

Duchy

The principal city in northern Italy and the second largest city of the modern republic, Milan is located in Lombardy, south of the foothills of the Alps. It is of ancient Gaulic tribal foundation, conquered by Rome in 222 BC and named Mediolanum. Sacked by Attila in 452 and destroyed by the Goths in 539, the city belonged to the Kingdom of the Lombards after being rebuilt and later, belonged to the Germanic Empire. Various families ruled the city in the later Middle Ages and it was also a republic for periods in the 13th, 14th and 15th centuries. The Visconti family became Lords of Milan in the early 14th century and the form of government was changed from elective to hereditary, the lord being raised to the rank of duke in 1395. In 1450, Francesco I Sforza inherited the duchy through marriage to the Visconti heiress and the Sforza's began to enhance the power and prestige of Milan. The city became a pawn in the power struggles between France and the Habsburgs, passing to the control of Spain in 1535, then to Austria in 1740. Conquered by France in 1796, Milan formed part of the Cisalpine Republic (see) from 1797, then the Italian Republic in 1802 and of the Kingdom of Italy from 1805 until 1814. In the latter year, Milan was ceded to Austria and became part of Lombardy-Venetia. In 1859, the city and territory was annexed to Sardinia, becoming part of united Italy.

NAPLES

(Napoli)

The Kingdom of Naples existed as a political entity for most of the period from the late 12th century to the middle of the 19th century. Throughout almost 700 years of its existence, the kingdom was ruled by dynasties from other countries, with periods of stability punctuated by the vicissitudes of war, famine, pestilence and civil strife. The kingdom took its name from that of the principal city of southern Italy, one of the oldest inhabited urban centers in the world. Founded as a Greek colony in the 9th-8th century BC as Neapolis (New City), Naples became part of the Roman Republic about 300 BC and was a major metropolitan region of the Roman Empire. The city was the capital of a duchy from the mid-6th century until the Normans, who had conquered Sicily earlier in the 12th century, took control and united the Neapolitan territories to their island. The geographical extent of the kingdom covered most of southern Italy and Sicily during periods when the two parts were united.

Naples came under the control of Aragon in the mid-15th century, was briefly taken by France in the early 16th century, and then ruled by the Spanish Habsburgs until 1714, at the end of the War of the Spanish Succession. For a brief time in 1647-48, a Neapolitan Republic was created, under the patronage of Duke Henri of Lorraine, as the result of a revolt against the Spanish viceroys. Austria ruled Naples in the early 18th century until a branch of the Spanish Bourbon dynasty was installed in 1734. During the Napoleonic period, a short-lived Parthenopean Republic was proclaimed in 1799 on the French model. The Bourbon king was briefly restored, only to be defeated by Napoleon himself, who then placed his own brother as monarch in the kingdom. After the defeat of Napolean, the Bourbons were restored once again and Naples was formally united to Sicily in 1816 as the Kingdom of the Two Sicilies. It was annexed by Sardinia-Piedmont in 1860 and became part of united Italy in 1861.

Coinage produced solely in Sicily for that island are listed under that name.

PAPAL STATES

During many centuries prior to the formation of the unified Kingdom of Italy, when Italy was divided into numerous independent papal and ducal states, the Popes held temporal sovereignty over an area in central Italy comprising some 17,000 sq. mi. (44,030 sq. km.) including the city of Rome. At the time of the general unification of Italy under the Kingdom of Sardinia, 1861, the papal dominions beyond Rome were acquired by that kingdom diminishing the Pope's sovereignty to Rome and its environs. In 1870, while France's opposition to papal dispossession was neutralized by its war with Prussia, the Italian army seized weakly defended Rome and made it the capital of Italy, thereby abrogating the last vestige of papal temporal power. In 1871, the Italian Parliament enacted the Law of Guarantees, which guaranteed a special status for the Vatican area, and spiritual freedom and a generous income for the Pope. Pope Pius IX and his successors adamantly refused to acknowledge the validity of these laws and voluntarily "imprisoned" themselves in the Vatican. The impasse between State and Church lasted until the signing of the Lateran Treaty, Feb. 11, 1929, by which Italy recognized the sovereignty and independence of the new Vatican City state.

PONTIFFS

Pius VII, 1800-1823
Sede Vacante, Aug. 20-Sept. 28, 1823
Leo XII, 1823-1829
Sede Vacante, Feb. 10-Mar. 31, 1829
Pius VIII, 1829-1830
Sede Vacante, Nov. 30, 1830-Feb. 2, 1831
Gregory XVI, 1831-1846
Sede Vacante, June 1-16, 1846
Pius IX, 1846-1878
Leo XIII, 1878-1903

MINT MARKS

B - Bologna
R – Rome

MONETARY SYSTEM

(Until 1860)
5 Quattrini = 1 Baiocco
5 Baiocchi = 1 Grosso
6 Grossi = 4 Carlini = 3 Giulio =
3 Paoli = 1 Testone.
14 Carlini = 1 Piastre
100 Baiocchi = 1 Scudo
10 Testone = Doppia

PARMA

A town in Emilia, which was a papal possession from 1512 to 1545, was seized by France in 1796, and was attached to the Napoleonic Empire in 1808. In 1814, Parma was assigned to Marie Louise, empress of Napoleon I. It was annexed to Sardinia in 1860.

RULERS

SARDINIA

Sardinia is an island located in the Mediterranean Sea, west of the southern Italian peninsula, 9,301 sq. mi.; population 1,645,192. Along with some minor islands, it constitutes an autonomous region of Italy separated on the north from Corsica, France by the Strait of Bonifacio.

Settled by Phoenicians and Greeks before it came under control of Carthage about 600 BC; taken by the Romans in 238 BC; part of the Vandal Kingdom during the 5th century; re-conquered by the Byzantine Empire in 533 AD. From the 8th century, it was frequently raided by Muslims, but that threat was eliminated by Pisa in 1016 as the object of a competitor's bet. The Genoese and Pisans were driven out by the Aragonese during the 14th-15th centuries, remaining under Spanish rule until 1708; held by Austria 1708-17, regained by the Spanish in 1717 until it was finally ceded to Savoy in 1720 in exchange for Sicily.

The combined territories of Savoy (Piedmont) and Sardinia were known henceforth as the Kingdom of Sardinia or Sardinia-Piedmont. For coinage of Sardinia prior to 1720, see Cagliari. As a result of Napoleon's invasion of Italy and his restructuring of the states in various regions, Carlo Emanuele IV abdicated in favor of his brother, Vittorio Emanuele I in 1802. Separate coinages were struck for the island of Sardinia and the Piedmontese mainland possessions. In 1816, the coinage system was reformed by the introduction of decimalization. As a result of the political upheavals of the 1850s in Italy, Vittorio Emanuele II was elected king of united Italy in 1859 and assumed the title in 1861.

RULERS

Carlo Emanuele IV 1796-1802
Vittorio Emanuele I 1802-1821
Carlo Felice 1821-1831
Carlo Alberto 1831-1849

SICILY

Sicily lies off the southwestern tip of mainland Italy and is the largest island in the Mediterranean Sea. It has been inhabited for millennia, early on by tribal peoples form various places around the Mediterranean in prehistoric times, followed by Elymians from the Aegean Sea and Phoenicians in the early historical period. Greek colonists began settling in Sicily around 750 BC and their most important urban center was Syracuse. Carthage also founded colonies in the western part of the island and clashes between those enclaves and the Greek area led to the series of conflicts known as the Punic Wars. The Roman Republic eventually intervened and upon defeating Carthage, annexed Sicily as the first Roman province outside of mainland Italy. The history of the island followed that of the Roman Republic and subsequent Empire, falling victim to barbarian invasions as the latter disintegrated. As the Byzantine Empire succeeded the Roman, Sicily came under a new threat in the rise of Islam in North Africa. The Muslim conquest of Sicily extended over more than a century as one town or city after another fell during the 9th and 10th centuries. This lasted until the second half of the 11th century, when Normans from northern Europe, who had gained a foothold in southern Italy, eventually conquered the island, culminating in the capture of Palermo in 1072. The Normans established the Kingdom of Sicilly and the island was ruled from that time on by a succession of European dynasties. The Spanish gained control of the island and the southern half of Italy by the 15th century and in the 18th century, a branch of the Bourbon dynasty ruled in both Sicily and Naples (see), usually as separate entities. After the Napoleonic Wars, Sicily and Naples were permanently united in the Kingdom of the Two Sicilies from 1816 until 1860. It was annexed by Sardinia-Piedmont in the latter year and became part of united Italy in 1861.

Coinage produced solely in Naples for use there are listed under that name.

RULERS

Bourbon
Ferdinando III, 1799-1810 (2nd reign)
Bourbon (restored)
Ferdinando III, 1814-1816 (3rd reign)
Two Sicilies
Ferdinando I, 1816-1825
Francesco I, 1825-1830
Ferdinando II, 1830-1859
Francesco II, 1859-1860

MINT MASTERS' INITIALS

Palermo Mint

Initials	Date	Name
JUI	1798-1807	Guiseppe Ugo, Marchese della Favara
VB	1810-16	Vincenzo Beninati

MONETARY SYSTEM

6 Piccioli = 1 Grano
5 Cinquina = 1 Tari
15 Tari = 1 Scudo
2 Scudi = 1 Oncia

ARMS

Displayed eagle, often crowned, sometimes with various shields of arms on breast

TUSCANY

Etruria

An Italian territorial division on the west-central peninsula, belonged to the Medici from 1530 to 1737,when it was given to Francis, duke of Lorraine. In 1800 the French established it as part of the Spanish dominions; from 1807 to 1809 it was a French department. After the fall of Napoleon it reverted to its pre-Napoleonic owner, Ferdinand III.

RULERS

Ferdinando III, 1791-1801
Louis I, 1801-1803
Charles Louis, under regency of his mother Maria Louisa, 1803-1807
Annexed To France, 1807-1814

VENICE

Venezia

The "Queen of the Adriatic," Venice grew from small settlements of refugees fleeing the waves of Germanic and Hun invasions during the 5th and 6th centuries, to become one of the great maritime powers of the Mediterranean in the following centuries. Early in the 8th century, the people living around the lagoons fearing further conquests by the Lombards, elected their first duke, Ursus, who is recognized as being the first Doge of Venice. At the beginning of the 9th century, the seat of the doge was moved to the Rialto and the first ducal palace, as well as the basilica of St. Mark, were constructed. Charlemagne recognized Venice as part of Byzantine territory in Italy and the city's trading rights along the Adriatic coast. When Venice acquired the purported relics of St. Mark from Alexandria in 828, its position as one of the major city-states of the Mediterranean was firmly fixed. As the city's commercial and naval power expanded during the next few centuries, Venice gradually gained control of other coasts and islands along the Adriatic and in the Eastern Mediterranean. Venice became an imperial power as a result of the Fourth Crusade in 1204, when it financed the Latin takeover of Constantinople and, by the late 13th century, was the most prosperous city in all of Europe. When the printing press made its appearance in Germany in the mid-15th century, Venice was quick to adopt the invention and became the printing capital of Europe by 1482.

The wealth of the city's commercial and political families financed the building of magnificent palaces and churches, as well as supported much of the art of the Renaissance in that part of Italy. The city began to decline at the same time, due in part, to the Turkish conquest of the Byzantine Empire and the subsequent loss of some territories in the Eastern Mediterranean. The discovery of the New World and the all-sea route to India destroyed the city's trade monopoly. By the time Napoleon conquered Venice and deposed the last doge in 1797, thus ending eleven centuries of the Republic, the city held only a remnant of its former territory and power, but still gloried in its many exquisite buildings and canals. Napoleon signed over control of Venice to Austria in the same year, but it became a part of his Kingdom of Italy in 1805. After Napoleon's defeat in 1814, Venice was returned to Austria as part of Lombardy-Venetia. Following the Third Italian War of Independence in 1866, Venice became a permanent part of the new Kingdom of Italy.

RULER

Francesco II d'Absburgo-Lorena, 1798-1805

Italy, a 700-mile-long peninsula extending into the heart of the Mediterranean Sea, has an area of 116,304 sq. mi. (301,230 sq. km.). Capital: Rome

From the fall of Rome until modern times, 'Italy' was little more than a geographical expression. Although nominally included in the Empire of Charlemagne and the Holy Roman Empire, it was in reality divided into a number of independent states and kingdoms presided over by wealthy families, soldiers of fortune or hereditary rulers. The 19th century unification movement fostered by Mazzini, Garibaldi and Cavour attained fruition in 1860-70 with the creation of the Kingdom of Italy and the installation of Victor Emmanuel, king of Sardinia, as king of Italy

RULERS
Vittorio Emanuele II, 1861-1878
Umberto I, 1878-1900
Vittorio Emanuele III, 1900-1946

MINT MARKS
B – Bologna (1861)
B/I – Birmingham (1893-94)
FIRENZE – Florence (1861)
H – Birmingham (1866-67)
KB – Berlin (1894)
M – Milan (1861-87)
N – Naples (1861-67)
OM – Strasbourg (1866-67)
R – Rome (All coins from 1878 have R except where noted.)
T – Turin (1861-67)
No MM – Paris (1862-66)

Jamaica, situated in the Caribbean Sea 90 miles south of Cuba Jamaica was discovered by Columbus on May 3, 1494, and settled by Spain in 1509. The island was captured in 1655 by a British naval force under the command of Admiral William Penn, sent by Oliver Cromwell and ceded to Britain by the Treaty of Madrid, 1670. For more than 150 years, the Jamaican economy of sugar, slaves and piracy was one of the most prosperous in the new world. Dissension between the property-oriented island legislature and the home government prompted parliament to establish a crown colony government for Jamaica in 1866.

In 1758, the Jamaican Assembly authorized stamping a certain amount of Spanish milled coinage. Token coinage by merchants aided the island's monetary supply in the early 19th century. Sterling coinage was introduced in Jamaica in 1825, with the additional silver three halfpence under William IV and Victoria. Certain issues of three pence of William IV and Victoria were intended for colonial use, including Jamaica.

There was an extensive token and work tally coinage for Jamaica in the late 19th and early 20th centuries.

RULER
British, until 1962

Japan is situated off the east coast of Asia. Japan, founded (so legend holds) in 660 B.C. by a direct descendant of the Sun Goddess, was first brought into contact with the west by a storm-blown Portuguese ship in 1542. European traders and missionaries proceeded to enlarge the contact until the Shogunate, sensing a military threat in the foreign presence, expelled all foreigners and restricted relations with the outside world in the 17th century. After Commodore Perry's U.S. flotilla visited in 1854, Japan rapidly industrialized, abolished the Shogunate and established a parliamentary form of government, and by the end of the 19th century achieved the status of a modern economic and military power. A series of wars with China and Russia, and participation with the allies in World War I, enlarged Japan territorially but brought its interests into conflict with the Far Eastern interests of the United States, Britain and the Netherlands, causing it to align with the Axis Powers for the pursuit of World War II. After its defeat in World War II, General Douglas MacArthur forced Japan to renounce military aggression as a political instrument, and he instituted constitutional democratic self-government. Japan quickly gained a position as an economic world power.

Japanese coinage of concern to this catalog includes those issued for the Ryukyu Islands (also called Liuchu), a chain of islands extending southwest from Japan toward Taiwan (Formosa), before the Japanese government converted the islands into a prefecture under the name Okinawa. Many of the provinces of Japan issued their own definitive coinage under the Shogunate.

RULERS

Shoguns

Iyenari, 1787-1837
Iyeoshi, 1837-1853
Iyesada, 1853-1858
Iyemochi, 1858-1866
Yoshinobu, 1866-1867

Emperors

Komei, 1847-1866
Mutsuhito (Meiji), 1867-1912

NOTE: The personal name of the emperor is followed by the name that he chose for his regnal era.

MONETARY SYSTEM

Until 1870

Prior to the Meiji currency reform, there was no fixed exchange rate between the various silver, gold and copper "cash" coins (which previously included Chinese "cash") in circulation. Each coin exchanged on the basis of its own merits and the prevailing market conditions. The size and weight of the copper coins and the weight and fineness of the silver and gold coins varied widely. From time to time the government would declare an official exchange rate, but this was usually ignored. For gold and silver, nominal equivalents were:

16 Shu = 4 Bu = 1 Ryo

Commencing 1870

10 Rin = 1 Sen
100 Sen = 1 Yen

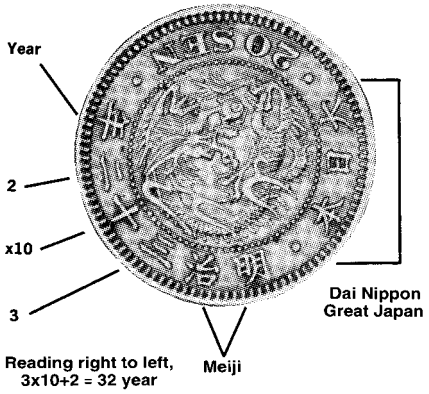
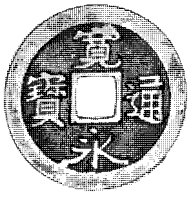
DATING



LEGENDS

Reading top-bottom, right-left.



Kanei Tsuho

Bunkyu-Eiho

KEY TO DATING MODERN MAMEITA GIN

文 'BUN' GENBUN PERIOD 1736-1741 (Used 1736-1818)

文 'BUN' BUNSEI PERIOD 1818-1830 (Used 1820-1837)

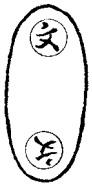
保 'HO' TEMPO PERIOD 1830-1844 (Used 1837-1858)

政 'SEI' ANSEI PERIOD 1854-1860 (Used 1859-1865)

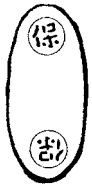
One of the above characters is usually found on the obverse of C#8 or both sides of C#8a and C#8b. The same characters are found at both ends of chogin pieces C#9. Era designators were used continuously until the next one was introduced, regardless of intervening eras.

NOTE: Values are for pieces weighing 5-8 grams. Pieces over 10 grams may command up to twice the values shown; pieces under 5 grams somewhat less.

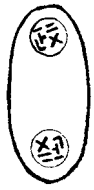
KEY TO DATING MODERN CHO GIN (SILVER)



BUNSEI ERA, 1818-1830



TEMPO ERA, 1830-1844



ANSEI ERA, 1854-1860

KEY TO DATING 1 SHU

常 KAEI ERA, 1848-1854 (Used 1853-1865)

常 MEIJI ERA, 1868-1912 (Used 1868-1869)

NOTE: C#12 type 1 Shu are dated according to how the character illustrated is written on the reverse. Meiji 1 Shu are also known as Kaheishi 1 Shu.

KEY TO DATING 1 BU

常是 TEMPO ERA, 1830-1844 (Used 1837-1854)

常是 ANSEI ERA, 1854-1860 (Used 1859-1868)

常是 MEIJI ERA, 1868-1912 (Used 1868-1869)

NOTE: 1 Bu are dated according to how the two characters above are written on the reverse of the piece. There are other variations as well. Meiji Bu also are known as Kaheishi Bu.

KEY TO DATING 1 AND 2 BU

文 GENBUN PERIOD 1 BU (Used 1736-1818)

保 TEMPO PERIOD 1830-1844 (Used 1837-1858)

文 BUNSEI PERIOD 2 BU TYPE A DATE MARK 1818-1830 (Used 1818-1828)

久 BUNSEI PERIOD 1 BU and 2 BU TYPE B DATE MARK 1818-1830 (Used 1819-1829 on 1 Bu) (Used 1828-1832 on 2 Bu)

正 ANSEI PERIOD 1854-1859 (Used 1859)

MANEN PERIOD 1859-1860 (Without era designator)

C#2b is dated according to its wieght. C#21c and C#21d can be distinguished by the character to the left on the obverse.

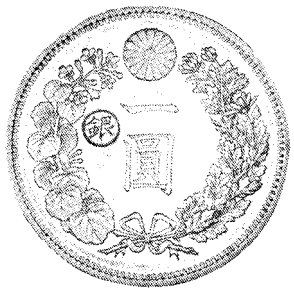
KEY TO DATING C#21c and C#21d

分 MANEN PERIOD 1860-1861 (Used 1860)

分 MEIJI PERIOD 1868-1912 (Used 1868-1869)

'GIN' COUNTERMARKS

Countermark: Gin right on 1 Yen Meiji Year 3, (1870), Y#5.



Countermark: *Gin* left on 1 Yen, Meiji Years 7-30, (1874-1897), Y#A25.

In 1897 Japan demonetized the silver one Yen and Trade Dollar coins, and many were melted to provide bullion from which to produce subsidiary coins. However, some 20 million Trade Dollars and one Yen coins were countermarked with the character *Gin* (meaning silver) and shipped to Taiwan, Korea and Southern Manchuria for use in circulation there. The countermark was applied to indicate that the coin was to be treated simply as bullion and to prevent the coins from returning to Japan where they could be sold to the government for gold.

The actual countermarking was done by the Tokyo and Osaka Mints; the Osaka Mint putting its *Gin* on the left side, the Tokyo Mint putting its *Gin* on the right side. Only 2,100,000 coins were countermarked at the Tokyo Mint Mint as opposed to 18,350,000 countermarked at Osaka, making the Tokyo pieces scarcer than the Osaka pieces.

Formerly *Gin* marked coins were regarded as damaged and sold for about 80 per cent of the price of the same coin without countermark. Now, however, the *Gin* coins are being collected by date and placement of the mark, and some sell for more than a non-countermarked piece. Any additional chop marks are still considered defacement and reduce the value of a coin substantially.

COUNTERMARKED COINAGE

1859

At the time the treaty ports were opened in 1859, Mexican 8 Reales pieces were counterstamped 'guaranteed 3 bu' so that they could circulate without having to be weighed at each transaction. In fact, the coins were about 4 percent over the weight of three one-bu pieces, but about 5 percent below the actual silver content of three one-bu pieces (because of the lower fineness of the Mexican coins).

The Bailiwick of Jersey, a British Crown dependency located in the English Channel 12 miles (19 km.) west of Normandy, France, has an area of 45 sq. mi. (117 sq. km.) and a population of 74,000. Capital: St. Helier. The economy is based on agriculture and cattle breeding – the importation of cattle is prohibited to protect the purity of the island's world-famous strain of milch cows.

Jersey was occupied by Neanderthal man by 100,000 B.C., and by Iberians of 2000 B.C. who left their chamber tombs in the island's granite cliffs. Roman legions almost certainly visited the island although they left no evidence of settlement. The country folk of Jersey still speak an archaic form of Norman-French, lingering evidence of the Norman annexation of the island in 933 A.D. Jersey was annexed to England in 1206, 140 years after the Norman Conquest. The dependency is administered by its own laws and customs; laws enacted by the British Parliament do not apply to Jersey unless it is specifically mentioned.

Coins of pre-Roman Gaul and of Rome have been found in abundance on Jersey.

KOREA

Korea, 'Land of the Morning Calm', occupies a mountainous peninsula in northeast Asia bounded by Manchuria, the Yellow Sea and the Sea of Japan.

According to legend, the first Korean dynasty, that of the House of Tangun, ruled from 2333 B.C. to 1122 B.C. It was followed by the dynasty of Kija, a Chinese scholar, which continued until 193 B.C. and brought a high civilization to Korea. The first recorded period in the history of Korea, the period of the Three Kingdoms, lasted from 57 B.C. to 935 A.D. and achieved the first political unification of the peninsula. The Kingdom of Koryo, from which Korea derived its name, was founded in 935 and continued until 1392, when it was superseded by the Yi Dynasty of King Yi. Sung Kye was to last until the Japanese annexation in 1910.

At the end of the 16th century Korea was invaded and occupied for 7 years by Japan, and from 1627 until the late 19th century it was a semi-independent tributary of China. Japan replaced China as the predominant foreign influence at the end of the Sino-Japanese War (1894-95), only to find her position threatened by Russian influence from 1896 to 1904. The Russian threat was eliminated by the Russo-Japanese War (1904-05) and in 1905 Japan established a direct protectorate over Korea. On Aug. 22,1910, the last Korean ruler signed the treaty that annexed Korea to Japan as a government generalcy in the Japanese Empire. Japanese suzerainty was maintained until the end of World War II.

From 1633 to 1891 the monetary system of Korea employed cast coins with a square center hole. Fifty-two agencies were authorized to procure these coins from a lesser number of coin foundries. They exist in thousands of varieties. Seed, or mother coins, were used to make the impressions in the molds in which the regular cash coins were cast. Czarist-Russian Korea experimented with Korean coins when Alexiev of Russia, Korea's Financial Advisor, founded the First Asian Branch of the Russo-Korean Bank on March 1, 1898, and authorized the issuing of a set of new Korean coins with a crowned Russian-style quasi-eagle. British-Japanese opposition and the Russo-Japanese War operated to end the Russian coinage experiment in 1904.

RULERS

Yi Sun (Chongjo Changhyo), 1777-1801
Yi Kwang (Sunjo Songhyo), 1801-1835
Yi Whan (Honjong Cholhyo), 1835-1850
Yi Chung (Choljong Yonghyo), 1850-1864
Yi Hyong (Kojong), 1864-1897
as Emperor Kwang Mu, 1897-1907

TAE DONG TREASURY DEPARTMENT
Cast Coinage with Cloisonné

Due to the added expense of adding the cloissonne enamel during production the silver one, two and three Chon KM#1081-83 were discontinued in June, 1883. Examples with cloissonne missing are valued at about one half normal valuations. There are many types of trial sets of 1, 2 and 3 Chon in existence.

MILLED COINAGE

During the 1880s and 1890s, Korea experimented with several different types of machine-struck coins including a struck 'Cash' coin with round center hole, KM#1100. Some pattern coins of this period exist, some of which may have actually entered circulation.

Kuwait is located on the Arabian Peninsula at the northwestern corner of the Persian Gulf. The modern history of Kuwait began with the founding of the city of Kuwait, 1740, by tribesmen who wandered northward from the region of the Qatar Peninsula of eastern Arabia. Fearing that the Turks would take over the sheikhdom, Sheikh Mubarak entered into an agreement with Great Britain, 1899, placing Kuwait under the protection of Britain and empowering Britain to conduct its foreign affairs. Britain terminated the protectorate on June19, 1961, giving Kuwait its independence (by a simple exchange of notes) but agreeing to furnish military aid on request.

Liberia is located on the southern side of the West African bulge between Sierra Leone and Ivory Coast. The Liberian coast was explored and charted by Portuguese navigator Pedro de Cintra in 1461. For the following three centuries Portuguese traders visited the area regularly to trade for gold, slaves and pepper. The modern country of Liberia, Africa's first republic, was settled in1822 by the American Colonization Society as a homeland for American freed slaves, with the U.S. government furnishing funds and assisting in negotiations for procurement of land from the native chiefs. The various settlements united in 1839 to form the Commonwealth of Liberia, and in 1847 established the country as a republic with a constitution modeled after that of the United States.

U.S. money was declared legal tender in Liberia in 1943, replacing British West African currency.

Most of the Liberian pattern series, particularly of the1888-90 period are acknowledged to have been 'unofficial' privately sponsored issues, but they are none the less avidly collected by many collectors of Liberian coins. The 'K' number designations on these pieces refer to a listing of Liberian patterns compiled and published by Ernst Kraus.

Libya is located on the north-central coast of Africa between Tunisia and Egypt. Libya has been subjected to foreign rule throughout most of its history, various parts of it having been ruled by the Phoenicians, Carthaginians, Vandals, Byzantines, Greeks, Romans, Egyptians, and in the following centuries the Arabs' language, culture and religion were adopted by the indigenous population. Libya was conquered by the Ottoman Turks in 1553, and remained under Turkish domination, becoming a Turkish vilayet in 1835, until it was conquered by Italy and made into a colony in 1911. The name 'Libya', the ancient Greek name for North Africa exclusive of Egypt, was given to the colony by Italy in 1934.

TRIPOLI

Tripoli (formerly Ottoman Empire Area of antique Tripolitania, 700-146 B.C.), the capital city and chief port of the Libyan Arab Jamahiriya, is situated on the North African coast on a promontory stretching out into the Mediterranean Sea. It was probably founded by Phoenicians from Sicily, but was under Roman control from 146 B.C. until 450 A.D. Invasion by Vandals and conquest by the Byzantines preceded the Arab invasions of the 11th century which, by destroying the commercial centers of Sabratha and Leptis, greatly enhanced the importance of Tripoli, an importance maintained through periods of Norman and Spanish control. Tripoli fell to the Turks, who made it the capital of the vilayet of Tripoli in 1551 and remained in their hands until 1911, when it was occupied by the Italians who made it the capital of the Italian province of Tripolitania. British forces entered the city on Jan. 23, 1943, and administered it until establishment of the independent Kingdom of Libya on Dec. 24, 1951.

MINT NAMES

طرابس

Tarabalus

طرابلس غرب

Tarabalus Gharb = (Tripoli West)

The appellation *west* serving to distinguish it from Tripoli in Lebanon, which had been an Ottoman Mint in the 16th century. On some of the copper coins, *Gharb* is omitted; several types come both with and without *Gharb*. The mint closed between the 28th and 29th year of the reign of Mahmud II.

MONETARY SYSTEM

The monetary system of Tripoli was confused and is poorly understood. Theoretically, 40 Para were equal to one Piastre, but due to the debasement of the silver coinage, later issues are virtually pure copper, though the percentage of alloy varies radically even within a given year. The 10 Para and 20 Para pieces were a little heavier than the copper Paras, with which they could easily be confounded, except that the copper Paras were generally thicker, and bear simpler inscriptions. It is not known how many of the coppers were tariffed to the debased Piastre and its fractions. Some authorities consider the copper pieces to be Beshliks (5 Para coins).

The gold coinage came in two denominations, the Zeri Mahbub (2.4-2.5 g), and the Sultani Altin (3.3-3.4 g). The ratio of the billon Piastres to the gold coins fluctuated from day to day.

COPPER COINAGE Under MAHMUD II

Under this rubric are included all pieces intended as paras. Many of the billon coins are so debased as to be nearly pure copper, but they can be distinguished from those coins intended as paras as they are much thinner, and bear different devices and inscriptions. Some pieces are also struck in brass.

In addition to pieces bearing no regnal year, the issuance of coppers seems to be restricted to two series, the first bearing years 12 & 13, the other years 20-27. The first group is related to an anomalous billon issue in the same years (Type D below), the second issue seems to be connected to the reduced weight series of years 21-25. The undated pieces were most probably struck during one of these two periods.

All of the following pieces appear to be of one denomination, probably a para, but vary in size from about 17-23mm.

BILLON COINAGE of Mahmud II

The billon coinage of Mahmud II is extremely varied, with a plethora of types deriving largely from contemporary Turkish, Egyptian, and Tunisian prototypes. There is considerable controversy over the denominations of these coins, although they seem to be based on a Piastre (40 Paras, Kuruns) of about 16 grams from yrs. 1-13, of about 12 grams from yrs. 13-21, and of 10 grams from yrs. 21-25. A new style coinage was introduced in yr. 28, but it was apparently never issued in sizable quantities and confined to the one year.

There is considerable weight variation within each denomination, in some cases up to 20 percent higher or lower than the theoretical norm. There is not yet discernible correlation between type, denomination, year, and standard. Recent evidence indicates that the net silver content was frequently and repeatedly reduced, probably in rather small increments. Thus the existence of several types for a single denomination and regnal year may indicate a multiplicity of issues with a single year, but as the full series is still not known, the complete sequence for each denomination cannot yet be reconstructed Debasements were frequent: In the 4-year period covering years 21-24, ten changes in the values of coinage are recorded, but not all changes need have referred to the denominations and designs.

Except for a few isolated miscellaneous types, all of the billon coinage can be classed into five basic types:

TYPE A: Obv: Toughra, sometimes with adjacent symbol, (i.e. flower, tamgha with arrow heads, large tamgha, crescent, letter "nun", and figures "22" and "23"). Rev: Year/mintname/*1223*.

TYPE B: Obv: Toughra/mintname/*1223*. Rev: 4-line leg. giving Sultan's titles: *Sultan al-Bahrayn Wa Khaqan al-Bahrayn al Sultan Ibn al Sultan* (sometimes with stars).

TYPE C: Obv: Sultan's name/benediction/mintname/*1223*. (4-line leg.) Rev: Same as rev. of Type B.

TYPE D: Obv: Sultan's name (sometimes with *1223*). Rev: Year/mintname/*1223* (1223 omitted when on obv.)

TYPE E: Obv: 4-line leg: *Sultan al Barrayn wa Khaqan al Bahrayn al Sultan Mahmud Khan Azza Nasruhu /*year. Rev: Mintname/*1223,* this type copied from Tunis piastre & fractions).

In addition to the variations in type, there is considerable variation in the borders. No attempt has been made in these listings to distinguish the various types of borders, though it is quite possible that such distinctions may have been monetarily important.

STANDARD COINAGE

The following listings are arranged by standard, and then by denomination within each standard. The sizes of the coins can vary considerably within each issue. The weight can vary by up to 20 percent higher or lower than the amounts shown.

All of the coins were struck in low-grade billon, tending toward pure copper on some of the later issues. Most of the coins originally were lightly silver-washed, and specimens with the silver wash intact are now quite scarce.

LIECHTENSTEIN

The Principality of Liechtenstein, is located in central Europe on the east bank of the Rhine between Austria and Switzerland. The lordships of Schellenburg and Vaduz were merged into the principality of Liechtenstein. It was a member of the Rhine Confederation from 1806 to 1815, and of the German Confederation from 1815 to 1866 when it became independent. Liechtenstein's long and close association with Austria was terminated by World War I. In 1921 it adopted the coinage of Switzerland, and two years later entered into a customs union with the Swiss, who also operated its postal and telegraph systems and represented it in international affairs. The tiny principality abolished its army in 1868 and has avoided involvement in all European wars since that time.

RULER

Prince John II, 1858-1929

The Grand Duchy of Luxembourg is located in western Europe between Belgium, Germany and France. Founded about 963, Luxembourg was a prominent country of the Holy Roman Empire; one of its sovereigns became Holy Roman Emperor as Henry VII, 1308. After being made a duchy by Emperor Charles IV, 1354, Luxembourg passed under the domination of Burgundy, Spain, Austria and France, 1443-1815, regaining autonomy under the Treaty of Vienna, 1815, as a grand duchy in union with the Netherlands, though ostensibly a member of the German Confederation. When Belgium seceded from the Kingdom of the Netherlands, 1830, Luxembourg was forced to cede its greater western section to Belgium. The tiny duchy left the German Confederation in 1867 when the Treaty of London recognized it as an independent state and guaranteed its perpetual neutrality. In the 19th century the kings of the Netherlands were also Grand Dukes of Luxembourg until in 1890 the Salic Law prevented Queen Wilhelmina from inheriting the Grand Duchy. Whereupon the succession went to the former Duke of Nassau (1839-66), Adolph who now became Grand Duke of Luxembourg. (In other words, Bismarck forced Adolph into early retirement at age 49, he then got his second job at age 73, passed away at 88!)

Luxembourg was occupied by Germany and liberated by American troops in both World Wars.

RULERS
William III (Netherlands), 1849-1890
Adolphe, 1890-1905

MADEIRA ISLANDS

The Madeira Islands, which belong to Portugal, are located 360 miles (492 km.) off the northwest coast of Africa. They have an area of 307 sq. mi. (795 sq. km.). The group consists of two inhabited islands named Madeira and Porto Santo and two groups of uninhabited rocks named Desertas and Selvagens. Capital: Funchal. The two staple products are wine and sugar. Bananas and pineapples are also produced for export.

Although the evidence is insufficient, it is thought that the Phoenicians visited Madeira at an early period. It is also probable that the entire archipelago was explored by Genoese adventurers; an Italian map dated 1351 shows the Madeira Islands quite clearly. The Portuguese navigator Goncalvez Zarco first sighted Porto Santo in 1418, having been driven there by a storm while he was exploring the coast of West Africa. Madeira itself was discovered in 1420. The islands were uninhabited when visited by Zarco, but soon after 1418 Madeira was quickly colonized by Prince Henry the Navigator, aided by the knights of the Order of Christ. British troops occupied the islands in 1801, and again in 1807-14.

MALACCA

A state of Malaysia on the west coast. It was settled from Sumatra in the 1300's, occupied by the Portuguese in 1511. Captured by the Dutch in 1641. Held by the British from 1795 to 1802 and 1811 to 1818 and finally ceded to Britain in 1824.

The attribution of the following coins to Malacca is uncertain. All were struck in England, on behalf of merchants in Singapore. All have an Arabic legend *Tanah Melayu* Land of the Malays, above a rooster.

PENANG

Pulu Penang-Prince of Wales Island

An island off the west coast of Malaysia. Ceded to the British in 1791 by the sultan of Kedah and was the first British settlement in Malaya. Also known as Pulu Penang and Prince of Wales Island - which title it retained until1867.

The currency system depended on the Spanish dollar divided into 100 pice (or cents) until 1826 when 48 pice were deemed the equivalent of one Bengal rupee until1830. The coins are considered in three groups:

(a) The Company bale mark series, consisting of copper1/10, 1/2 and 1 pice of 1786/1787, and silver tenth, quarter and half dollars, dated 1788;

(b) Company coat of arms issues in copper between1810 and 1828 in denominations of 1/2, 1 and double pice pieces; and

(c) Tin issues of local mintage pice pieces of 1800-1809,which are extremely rare.

The Republic of Maldives, an archipelago of 2,000 coral islets in the northern Indian Ocean 417 miles (671 km.) west of Ceylon, has an area of 116 sq. mi. (298 sq. km.)and a population of 189,000. Capital: Male. Fishing employs 95% of the male work force. Dried fish, copra and coir yarn are exported.

The Maldive Islands were visited by Arab traders and converted to Islam in 1153. After being harassed in the16th and 17th centuries by Mopla pirates of the Malabar coast and Portuguese raiders, the Maldivians voluntarily placed themselves under the suzerainty of Ceylon. In 1887 the islands became an internally self-governing British protectorate and a nominal dependency of Ceylon. Traditionally a sultanate, the Maldives became a republic in 1953 but restored the sultanate in 1954. The Sultanate of the Maldive Islands attained complete internal and external autonomy on July 26, 1965, and on Nov. 11,1968, again became a republic.

Mahle (Male)

MONETARY SYSTEM

100 Lari = 1 Rupee (Rufiyaa)

NOTE: The metrology of the early coinage is problematical. There seem to have been three denominations: a double Larin of 8-10 g, a Larin of approximately 4.8 g, and a half Larin that varied from 1.1 to 2.4 g, known as the Bodu Larin, Larin and Kuda Larin, respectively. In some years probably when copper was cheap (AH1276 & 1294),the Kuda (1/2) Larin is found with weights as high as 3.5 g. During the rule of Muhammad Imad Al-Din II Al-Muzaffar Bin Muhammad (1704-1721AD) additional denominations in the form of the 1/4, 1/8 and 1/16 Larin (1.17 g, 0.55 g and 0.29 g) were introduced on an experimental basis. This experiment was not followed by later rulers with the exception of Muhammad Imad Al-Din IV (1835-1882AD) who struck some lightweight coins of about 1.1 g which can be considered 1/4 Larins.

SULTANATE

Muhammad Mu'in al-Din Iskandar
AH 1213-1250 / 1798-1835 AD

STANDARD COINAGE

KM# 32 1/2 LARIN (Kuda)

Copper, Bronze Or Brass, 1.40-2.40 mm. **Note:** Weight and size varies: 1.40-2.40 grams; 9-13 mm.

Date	Mintage	Good	VG	F	VF	XF

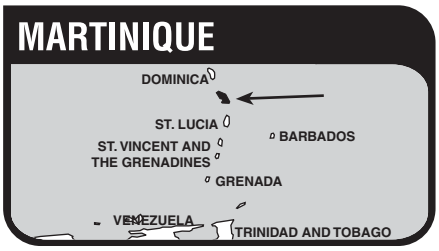
MARTINIQUE



The French Overseas Department of Martinique, located in the Lesser Antilles off the West Indies between Dominica and Saint Lucia, has an area of 425 sq. mi.(1,100 sq. km.).

Christopher Columbus discovered Martinique, probably on June 15, 1502. France took possession on June 25, 1635, and has maintained possession since that time except for three short periods of British occupation during the Napoleonic Wars. A French department since 1946, Martinique voted a reaffirmation of that status in 1958, remaining within the new French Community. Martinique was the birthplace of Napoleon's Empress Josephine, and the site of the eruption of Mt. Pelee in 1902 that claimed 40,000 lives.

The Republic of Mauritius, is located in the Indian Ocean 500 miles (805 km.) east of Madagascar, has an area of 790 sq. mi. (1,860 sq. km.).

Cartographic evidence indicates that Arabs and Malays arrived at Mauritius during the Middle Ages. Domingo Fernandez, a Portuguese navigator, visited the island in the early 16th century, but Portugal made no attempt at settlement. The Dutch took possession, and named the island, in 1598. Their colony failed to prosper and was abandoned in 1710. France claimed Mauritius in 1715 and developed a strong and prosperous colony that endured until the island was captured by the British, 1810, during the Napoleonic Wars. British possession was confirmed by the 1814 Treaty of Paris. Mauritius became independent on March 12, 1968. It is a member of the Commonwealth of Nations.

The first coins struck under British auspices for Mauritius were undated (1822) and bore French legends.

MEXICO

The United States of Mexico, located immediately south of the United States has an area of 759,529 sq. mi. (1,967,183 sq. km.) and an estimated population of 88 million. Capital: Mexico City. The economy is based on agriculture, manufacturing and mining. Oil, cotton, silver, coffee, and shrimp are exported.

Mexico was the site of highly advanced Indian civilizations 1,500 years before conquistador Hernando Cortes conquered the wealthy Aztec empire of Montezuma,1519-21, and founded a Spanish colony which lasted for nearly 300 years. During the Spanish period, Mexico, then called New Spain, stretched from Guatemala to the present states of Wyoming and California, its present northern boundary having been established by the secession of Texas during 1836 and the war of 1846-48 with the United States.

Independence from Spain was declared by Father Miguel Hidalgo on Sept. 16, 1810, (Mexican Independence Day) and was achieved by General Agustin de Iturbide in1821. Iturbide became emperor in 1822 but was deposed when a republic was established a year later. For more than fifty years following the birth of the republic, the political scene of Mexico was characterized by turmoil which saw two emperors (including the unfortunate Maximilian), several dictators and an average of one new government every nine months passing swiftly from obscurity to oblivion. The land, social, economic and labor reforms promulgated by the Reform Constitution of Feb. 5, 1917 established the basis for sustained economic development and participative democracy that have made Mexico one of the most politically stable countries of modern Latin America.

CHIHUAHUA

The Chihuahua Mint was established by a decree of October 8, 1810 as a temporary mint. Their first coins were cast 8 Reales using Mexico City coins as patterns and obliterating/changing the mint mark and moneyer initials. Two c/m were placed on the obverse - on the left, a T designating receipt by the Royal Treasurer, crowned pillars of Hercules on the right with pomegranate beneath, the comptrollers symbol.

In 1814, standard dies were made available, thus machine struck 8 Reales were produced until 1822. Only the one denomination was made at Chihuahua.

Mint mark: CA.

Note: Occasionally these are found struck over cast Chihuahua 8 reales and are very rare in general, specimens dated prior to 1816 are rather crudely struck

GUADALAJARA

The Guanajuato Mint was authorized December 24, 1812 and started production shortly thereafter; closing for unknown reasons on May 15, 1813. The mint was reopened in April, 1821 by the insurgents, who struck coins of the old royal Spanish design to pay their army, even after independence, well into 1822.

Only the 2 and 8 Reales coins were made.

Mint mark: Go.

Note: Several varieties exist.

OAXACA

The city of Oaxaca was in the midst of a coin shortage when it became apparent the city would be taken by the Insurgents. Royalist forces under Lt. Gen. Saravia had coins made. They were cast in a blacksmith shop. 1/2, 1, and 8 Reales were made only briefly in 1812 before the Royalists surrendered the city.

SAN FERNANDO DE BEXAR

San Fernando de Bexar, known today as San Antonio, was a military center and capital of the Province of Texas in New Spain. In the early part of the 19th century it experienced a shortage of small denomination coinage, which caused problems with the flow of local trade.

In 1817, Manual Barrera, a local merchant was granted the right by the Governor of the Province to issue small denomination pieces to relieve this problem. No examples of the Barrera tokens resulting from March 20, 1817 decree are known to exist.

Later that year a new Governor was appointed and in 1818 Jose Antonio de la Garza, the city's Postmaster applied for and was granted, by Governor Martinez decree of November 30, 1818, permission to strike and circulate small copper pieces of 1/2 Real denomination. De la Garza was required to redeem any Barrera pieces still in circulation within 12 days, exchanging them for his new copper jolas, to be bonded and to redeem his own pieces on command. The Governor's proclamation of December 6, 1818 made these details known to the public.

It is presumed that all Barrera pieces were destroyed upon redemption. Similarly the tokens of Jose Antonio de la Garza were mostly destroyed after redemption, with most of the few remaining examples being discovered along the banks of the San Antonio River, where de la Garza owned property.

SOMBRERETE

(Under Royalist Vargas)

The Sombrerete Mint opened on October 8, 1810 in an area that boasted some of the richest mines in Mexico. The mint operated only until July 16, 1811, only to reopen in 1812 and finally close for good at the end of the year. Mines Administrator Fernando Vargas, was also in charge of the coining, all coins bear his name.

VALLADOLID MICHOACAN

(Now Morelia)

Valladolid, capitol of Michoacan province, was a strategically important center for military thrusts into the adjoining provinces. The Royalists made every effort to retain the position. In 1813, with the advance of the insurgent forces, it became apparent that to maintain the position would be very difficult. During 1813 it was necessary to make coins in the city due to lack of traffic with other areas. These were made only briefly before the city fell and were also used by the insurgents with appropriate countermarks.

ZACATECAS

The city of Zacatecas, in a rich mining region has provided silver for the world since mid-1500. On November 14, 1810 a mint began production for the Royalist cause. Zacatecas was the most prolific during the War of Independence. Four of the 5 standard silver denominations were made here, 4 Reales were not. The first, a local type showing mountains of silver on the coins were made only in 1810 and 1811. Some 1811 coins were made by the Insurgents who took the city on April 15, 1811, later retaken by the Royalists on May 21, 1811. Zacatecas struck the standard Ferdinand VII bust type until 1822.

Mint marks: Z, ZS, Zs.

NUEVA GALICIA

(Later became Jalisco State)

In early colonial times, Nueva Galicia was an extensive province which substantially combined later provinces of Zacatecas and Jalisco. These are states of Mexico today although the name was revived during the War of Independence. The only issue was 2 Reales of rather enigmatic origin. No decrees or other authorization to strike this coin has yet been located or reported.

OAXACA

INSURGENT COINAGE

Oaxaca was the hub of Insurgent activity in the south where coinage started in July 1811 and continued until October 1814. The Oaxaca issues represent episodic strikings, usually under dire circumstances by various individuals. Coins were commonly made of copper due to urgency and were intended to be redeemed at face value in gold or silver once silver was available to the Insurgents. Some were later made in silver, but most appear to be of more recent origin, to satisfy collectors.

VERACRUZ

In Zongolica, in the province of Veracruz, 2 priests and a lawyer decided to raise an army to fight for independence. Due to isolation from other Insurgent forces, they decided to make their own coins. Records show that they intended to mint coins of 1/2, 1, 2, 4, and 8 Reales, but specimens are extant of only the three higher denominations.

MULTIPLE COUNTERMARKS

Many combinations of Royalist and Insurgent countermarks are usually found on the cast copies produced by Chihuahua and Mexico City and on the other crude provisional issues of this period. Struck Mexico City coins were used to make molds for casting necessity issues and countermarked afterwards to show issuing authority. Some were marked again by either both or separate opposing friendly forces to authorize circulation in their areas of occupation. Some countermarks are only obtainable with companion markings.

MEXICO CITY MINT

Because of the great number of assayers for this mint (Mexico City is a much larger mint than any of the others)there is much confusion as to which initial stands for which assayer at any one time. Therefore we feel that it would be of no value to list the assayers.

DIE VARIETIES

Similar basic designs were utilized by all the Mexican mints, but many variations are noticeable, particularly in the eagle, cactus and sprays.

1835 Durango, 8 Escudos
Illustration enlarged.

A large winged eagle was portrayed on the earlier coinage of the new republic.

1849 Mexico City, 8 Escudos
Illustration enlarged.

The later eagle featured undersized wings.

1844 Durango, 8 Escudos
Illustration enlarged.

The early renditions of the hand held Liberty cap over open book were massive in the gold escudo series.

1864 Durango, 8 Escudos
Illustration enlarged.

A finer, more petite style was adopted later on in the gold escudo series.

PROFILE EAGLE COINAGE

The first coins of the Republic were of the distinctive Profile Eagle style, sometimes called the "Hooked Neck Eagle". They were struck first in Mexico City in 1823 in denominations of eight reales and eight escudos. In 1824, they were produced at the Durango and Guanajuato mints in addition to Mexico City. Denominations included the one half, one, two and eight reales. No gold escudos of this design were struck in 1824. In 1825, only the eight reales were struck briefly at the Guanajuato mint.

NOTE: For a more extensive examination of Profile Eagle Coinage, please refer to Hookneck - El Aguila de Perfil by Clyde Hubbard and David O Harrow.

Guanajuato

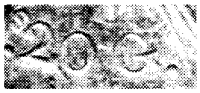
KM# A376.1 8 REALES

27.0700 g., 0.9030 Silver 0.7859 oz. ASW **Obv:** Full breast profile eagle, snake in beak **Obv. Legend:** REPUBLICA MEXICANA. **Rev:** Radiant cap

Date	Mintage	F	VF	XF	Unc	BU
1824Go JM	—	250	400	1,100	3,500	—
1825/4Go JJ	—	600	1,200	2,750	7,000	—
1825Go JJ	—	500	750	1,400	5,500	—

1825/4 JJ overdate

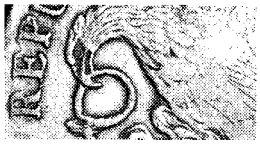
NOTE: Most examples of this overdate exhibit the results of a warped obverse die.



NOTE: Other easily identified die varieties are the 1824 w/the missing superscript "s" for granos and the 1825 w/a dash under the "I" of MEXICANA resulting from a die chip, but these die varieties are not rare.

NOTE: Guanajuato eight reales are characterized by flat strikes on large, thin planchets. Visible feather details on the eagle's breast and legible Libertads on the cap are the exception.

Tight snake loop at eagle's beak.



Open snake loop at eagle's beak.

The Standard or Republic Edge

The Colonial or Circle & Rectangle

The standard Flat-Topped Three

Mexico City

KM# A376.2 8 REALES

27.0700 g., 0.9030 Silver 0.7859 oz. ASW **Obv:** Full breast profile eagle, snake in beak **Obv. Legend:** REPUBLICA MEXICANA **Rev:** Radiant cap **Edge:** Standard or Republic

Date	Mintage	F	VF	XF	Unc	BU
1823Mo JM	—	150	300	800	4,500	—
1824Mo JM	—	125	250	700	4,000	—

KM# A376.3 8 REALES

27.0700 g., 0.9030 Silver 0.7859 oz. ASW **Obv:** Full breast profile eagle, snake in beak **Rev:** Radiant cap **Edge:** Colonial or circle and rectangle

Date	Mintage	F	VF	XF	Unc	BU
1823Mo JM Rare	—	—	—	—	—	—

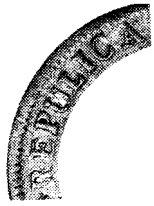
The Round-Topped Three

KM# A376.4 8 REALES

27.0700 g., 0.9030 Silver 0.7859 oz. ASW **Obv:** Full breast profile eagle, snake in beak **Rev:** Radiant cap, round topped three **Edge:** Standard or Republic

Date	Mintage	F	VF	XF	Unc	BU
1823Mo JM	—	2,000	4,000	6,000	8,000	—

Note: Many die varieties exist; Illustrations of one of the die differences is the size of the snake loop at the eagle's beak; This difference is not apparent except on the 1824 Mo 8 Reales



KM# A376.5 8 REALES

27.0700 g., 0.9030 Silver 0.7859 oz. ASW **Obv:** Full breast profile eagle, snake in beak, REPULICA (error) **Rev:** Radiant cap

Date	Mintage	F	VF	XF	Unc	BU
1824Mo JM	—	6,000	9,000	11,000	—	—

Note: Legible Libertads on the cap are not as prevalent on the Mexico City 8 Reales as on the Durango 8 Reales; They are much more numerous than on the Guanajuato 8 Reales

Type I Obverse/Reverse

NOTE: The cap on the reverse of the curved tail Type I points to the "A" of LIBERTAD.

Mexico City

KM# 382.1 8 ESCUDOS

27.0700 g., 0.8750 Gold 0.7615 oz. AGW **Obv:** Profile eagle, snake's tail curved **Obv. Legend:** REPUBLICA MEXICANA **Rev:** Open book, hand holding stick with cap, cap points to "A" of LIBERTAD **Rev. Legend:** LIBERTAD EN...

Date	Mintage	F	VF	XF	Unc	BU
1823Mo JM	—	7,000	10,000	20,000	35,000	—

Note: American Numismatic Rarities Eliasberg sale 4-05, MS-61 realized $55,200.

Type II Obverse/Reverse

NOTE: The cap on the reverse of the looped tail Type II points to the "T" of LIBERTAD.

KM# 382.2 8 ESCUDOS

27.0700 g., 0.8750 Gold 0.7615 oz. AGW **Obv:** Profile eagle, snake's tail looped **Obv. Legend:** REPUBLICA MEXICANA **Rev:** Open book, hand holding stick with cap, cap points to "T" of LIBERTAD **Rev. Legend:** LIBERTAD EN...

Date	Mintage	F	VF	XF	Unc	BU
1823Mo JM	—	6,000	9,000	18,000	35,000	—

Note: The quality of the strikes of Type I coins is almost always superior to that of the Type II; Details of the eagle feathers, cactus and lettering on the open book are better on most Type I coins but the Type II coins are scarcer; Type I coins outnumber Type II coins by about two to one

MOLDAVIA & WALLACHIA

These two principalities have constituted the base of modern Romania. Wallachia and Moldova were established early in the 14th century. Following some wars against Hungarian kings, both principalities became independent.

Union of the principalities was voted for unanimously in 1848 and the two assemblies elected a prince in the person of Alexander Cuza on Jan. 17, 1859, accomplishing the de facto union of Romania. The prince, through lack of agrarian reform, was compelled to abdicate in Feb. 1866, and was succeeded by Prince Carol I who later became King in 1881.

MOMBASA

Mombasa was a thriving Arabic commercial center when first visited by Portuguese navigator Vasco da Gama in 1498. During the following two centuries Portugal made repeated efforts to capture the island stronghold but was unable to hold it against the assaults of the Muscat Arabs. In 1823 the ruling Mazuri family placed the city under British protection. Britain repudiated the protectorate and it was then seized by Seyyid Said of Oman, 1837, and annexed to Zanzibar. In 1887 the sultan of Zanzibar relinquished the port of Mombasa to British administration. It was occupied by the Imperial British East Africa Company and for the following two decades was the capital of British East Africa.

The Principality of Monaco, located on the Mediterranean coast nine miles from Nice, has an area of 0.58 sq. mi. (1.9 sq. km.). Capital: Monaco-Ville.

Monaco derives its name from Monoikos', the Greek surname for Hercules, the mythological strong man who, according to legend, formed the Monacan headland during one of his twelve labors. Monaco has been ruled by the Grimaldi dynasty since 1297 - Prince Rainier III, the present and 31st monarch of Monaco, is still of that line - except for a period during the French Revolution until Napoleon's downfall when the Principality was annexed to France. Since 1865, Monaco has maintained a customs union with France which guarantees its privileged position as long as the royal line remains intact.

CATTARO

A seaport of Montenegro, Yugoslavia, occupies a ledge between the Montenegrin mountains and an inlet of the Adriatic Sea which forms one of the finest natural harbors in the world. It has at various times been occupied by Turks, Venetians, Spaniards, French, English and Austrians. It became a part of Yugoslavia in 1918. Cattarowas united to the French Empire during the period of 1807-13. In 1813, while the city was besieged by Montenegrins and a British fleet, the French defenders issued an emergency cast silver coinage.

The Kingdom of Morocco, situated on the northwest corner of Africa, has an area of 432,620 sq. mi. (710,850 sq. km.). Capital: Rabat.

Morocco's strategic position at the gateway to western Europe has been the principal determinant of its violent, frequently unfortunate history. Time and again the fertile plain between the rugged Atlas Mountains and the sea has echoed the battle's trumpet as Phoenicians, Romans, Vandals, Visigoths, Byzantine Greeks and Islamic Arabs successively conquered and occupied the land. Modern Morocco is a remnant of an early empire formed by the Arabs at the close of the 7th century which encompassed all of northwest Africa and most of the Iberian Peninsula. During the 17th and 18th centuries, while under the control of native dynasties, it was the headquarters of the famous Sale pirates. Morocco's strategic position involved it in the competition of 19th century European powers for political influence in Africa, and resulted in the division of Morocco into French and Spanish spheres of interest which were established as protectorates in 1912. Morocco became independent on March 2, 1956, after France agreed to end its protectorate. Spain signed similar agreements on April 7 of the same year.

NOTE: Several Filali Sharifs had the title 'Moulay" (my lord).

EARLY COINAGE

Prior to the introduction of modern machine-struck coinage in Morocco in AH1299/1882AD the coinage of the Filali Sharifs contained of a variety of primitive hammered copper and cast bronze coins as well as of crudely hammered silver and gold issues which were in circulation together with considerable quantities of foreign coins.

The cast bronze (starting with Al-Yazid in AH1204/1790AD) were produced in several denominations, multiples and fractions of the basic unit of the Falus (Felous). The expression Zelagh (Zalagh) was used for all fractions of the Falus. After the Monetary Reform of 1902AD the Mazuna (or Muzuna, Mouzuna, Mawzuna) was the standard bronze unit. The size and weights of the pre-1902AD coins vary, which sometimes makes its distinction difficult, in particular for earlier rulers. Early types are varied, with different ornamentation and designs, some undated and/or without mint name, which makes a complete presentation of all varieties impossible. Beginning in AH1208, the obverse bears the Seal of Solomon (hexagram) and the reverse includes the date and/or mint name. All cast bronzes with only ornaments or the Seal of Solomon on both sides are issues of Sulayman. The mint (if present) is in Arabic script and starting with issues of Mohammed III the date (when present) is in Western numerals. The bronze pieces were cast in "trees" and occasionally entire or partial "trees" are found in the market.

Some bronze issues of Mohammed IV with illegible dates and mints and often light in weight are considered contemporary counterfeits. The war with Spain led to a chaotic and bad economic period in Morocco, during which Dirhams have been counterfeited by silver-plating hammered copper and brass pieces with dates AH1283-89/1866-72AD of Mohammed IV.

The silver and gold coins usually have the mint name on one side and the date on the other side. The original silver unit was the "legal dirham" of 2.931 grams standard weight, changing to several lower standards depending on the economic situation. A ¼ Dirham was called Mazuna until AH1213. The gold units Dinar and beginning with Sulayman, the Benduqi (Bonduqi) had 3.52 grams standard weight.

All weights indicated in the following listings for bronze, silver and gold coins are standards weights; actual weights of coins found can differ considerably. Anonymous strikes can be assigned to individual rulers by date, design and weight standard. Prices are for specimens with clearly legible dates (if any) and mint names (if any). Illegible and defectively produced pieces are worth much less.

To have more information on Moroccan issues from AH1075-1400/1664-1980AD, refer to Corpus des Monnaies Alawites by Daniel Eustache, Rabat 1984. For professional comments and estimate of rarity for all weights standards, see A Checklist of Islamic Coins by Stephen Album, Santa Rosa 1998. Information on Mazuna-strikes of Fes of AH1320-1323/1902-1205AD can be found in Monedas de Marruecos by Sanchez-Giron Blasco, Ceuta 1980. For details of Moroccan issues from AH1297-1380/1879-1960AD, refer to Monnaies et Jetons des Colonies Francaises by Jean Lecompte, Monaco 2000. Excellent drawings of bronze coins of Morocco, from AH1184-1321/1770-1903AD, can be found in Modern Copper Coins of the Muhammadan States by W. H. Valentine, London 1911 (reprint 1969).

NOTE: Prices are for specimens with clearly legible dates and mint names (if any). Illegible, barbarous, and defectively produced pieces are worth much less. Between AH1221-36 due to the bad economic situation no Dirhams were minted.

NOTE: Falus, most issues show ornaments on both sides composed of interlacing lines in a circle/square with inscriptions around, some issues have octagonal/hexagonal designs besides inscriptions Bronze, 3.97 g, 18-24mm.

The Republic of Mozambique, a former overseas province of Portugal, stretches for 1,430 miles (2,301km.) along the southeast coast of Africa, has an area of 302,330 sq. mi. (801,590 sq. km.).

Vasco de Gama explored all the coast of Mozambique in 1498 and found Arab trading posts already established along the coast. Portuguese settlement dates from the establishment of the trading post of Mozambique in 1505. Within five years Portugal absorbed all the former Arab sultanates along the east African coast.

COUNTERMARKED COINAGE
Decree of January 5, 1889

This decree ordained that all foreign silver coinage circulating in Mozambique was to be countermarked with a crowned PM within a circle. These coins were eventually to be replaced or exchanged by current Portuguese coinage upon their entry into the public treasury. The following list is a basic guide. Caution should be exercised as counterfeits exist. Grades noted are for the basic coin as the countermark is normally found in better condition than the coin bearing it.

COUNTERMARKED COINAGE
Decree of January 19, 1889

During the reign of D. Carlos I, a substitution of an indented PM (Provincia de Mocambique) which replaced the crowned PM of D. Luis I, was countermarked on all foreign silver coinage circulating in Mozambique. These coins were to be replaced or exchanged by Portuguese coinage on their entry into the public treasury.

NEPAL

The Kingdom of Nepal, the world's only surviving Hindu kingdom, is a landlocked country occupying the southern slopes of the Himalayas. It has an area of 56,136 sq. mi. (140,800 sq. km.).

Apart from a brief Muslim invasion in the 14th century, Nepal was able to avoid the mainstream of Northern Indian politics, due to its impregnable position in the mountains. It is therefore a unique survivor of the medieval Hindu and Buddhist culture of Northern India which was largely destroyed by the successive waves of Muslim invasions.

Prior to the late 18th century, Nepal was divided among a number of small states. Unless otherwise stated, the term *Nepal* applies to the small fertile valley, about 4,500 ft. above sea level, in which the three main cities of Kathmandu, Patan and Bhatgaon are situated.

During the reign of King Yaksha Malla (1428-1482AD), the Nepalese kingdom, with capital at Bhatgaon, was extended northwards into Tibet, and also controlled a considerable area to the south of the hills. After Yaksha Malla's death, the Kingdom was divided among his sons, so four kingdoms were established with capitals at Bhatgaon, Patan, Kathmandu and Banepa, all situated within the small valley, less than 20 miles square. Banepa was quickly absorbed within the territory of Bhatgaon, but the other three kingdoms remained until 1769. The internecine strife between the three kings effectively stopped Nepal from becoming a major military force during this period, although with its fertile land and strategic position, it was by far the wealthiest and most powerful of the Himalayan states.

Apart from agriculture, Nepal owed its prosperity to its position on one of the easiest trade routes between the great monasteries of central Tibet, and India. Nepal made full use of this, and a trading community was set up in Lhasa during the 16th century, and Nepalese coins became the accepted currency medium in Tibet.

The seeds of discord between Nepal and Tibet were sown during the first half of the 18th century, when the Nepalese debased the coinage, and the fate of the Malla kings of Nepal was sealed when Prithvi Narayan Shah, King of the small state of Gorkha, to the west of Kathmandu, was able to gain control of the trans-himalayan trade routes during the years after 1750.

Prithvi Narayan spent several years consolidating his position in hill areas before he finally succeeded in conquering the Kathmandu Valley in 1768, where he established the Shah dynasty, and moved his capital to Kathmandu.

After Prithvi Narayan's death a period of political instability ensued which lasted until the 1840's when the Rana family reduced the monarch to a figurehead and established the post of hereditary Prime Minister.

DATING

Nepal Samvat Era (NS)

All coins of the Malla kings of Nepal are dated in the Nepal Samvat era (NS). Year 1 NS began in 881, so to arrive at the AD date add 880 to the NS date. This era was exclusive to Nepal, except for one gold coin of Prana Narayan of Cooch Behar.

Saka Era (SE)

Up until 1888AD all coins of the Gorkha Dynasty were dated in the Saka era (SE). To convert from Saka to AD take Saka date and add 78 to arrive at the AD date. Coins dated with this era have SE before the date in the following listing.

Vikrama Samvat Era (VS)

From 1888AD most copper coins were dated in the Vikram Samvat (VS) era. To convert take VS date - 57 =AD date. Coins with this era have VS before the year in the listing. With the exception of a few gold coins struck in 1890 & 1892, silver and gold coins only changed to the VS era in 1911AD, but now this era is used for all coins struck in Nepal.

MONETARY SYSTEM

COPPER

Initially the copper paisa was not fixed in value relative to the silver coins, and generally fluctuated in value from1/32 mohar in 1865AD to around 1/50 mohar afterc1880AD, and was fixed at that value in 1903AD.

4 Dam = 1 Paisa
2 Paisa = 1 Dyak, Adhani

GOLD COINAGE

Nepalese gold coinage until recently did not carry any denominations and was traded for silver, etc. at the local bullion exchange rate. The three basic weight standards used in the following listing are distinguished for convenience, although all were known as Asarphi (gold coin) locally as follows:

GOLD MOHAR

5.60 g multiples and fractions

TOLA

12.48 g multiples and fractions

GOLD RUPEE or ASARPHI

11.66 g multiples and fractions
(Reduced to 10.00 g in 1966)

NOTE: In some instances the gold and silver issues were struck from the same dies.

NUMERALS

Nepal has used more variations of numerals on theircoins than any other nation. The most common areillustrated in the numeral chart in the introduction. Thechart below illustrates some variations encompassing thelast four centuries.

1	2	3	4	5	6	7	8	9	0
१	२	३	४	५	६	७	८	९	०
१	२		४	५	६	७	८	९

Rupee	रुपैयाँ
Ashrapi	असार्फो
Asarfi	अश्रफो

DIE VARIETIES

Although the same dies were usually used both for silver and gold minor denominations, the gold Mohar is easily recognized being less ornate. The following illustrations are of a silver Mohar, KM#602 and a gold Mohar KM#615 issued by Surendra Vikrama Saha Deva in the period SE1769-1803/1847-1881AD. Note the similar reverse legend. The obverse usually will start with the character for the word Shri either in single or multiples, the latter as Shri Shri Shri or Shri 3.

The Kingdom of the Netherlands, a country of western Europe fronting on the North Sea and bordered by Belgium and Germany, has an area of 15,770 sq. mi. (41,500 sq. km.).

After being a part of Charlemagne's empire in the 8th and 9th centuries, the Netherlands came under control of Burgundy and the Austrian Hapsburgs, and finally was subjected to Spanish dominion in the 16th century. Led by William of Orange, the Dutch revolted against Spain in 1568. The seven northern provinces formed the Union of Utrecht and declared their independence in 1581,becoming the Republic of the United Netherlands. In the following century, the *Golden Age* of Dutch history, the Netherlands became a great sea and colonial power, a patron of the arts and a refuge for the persecuted. The United Dutch Republic ended in 1795 when the French formed the Batavian Republic. Napoleon made his brother Louis, the King of Holland in 1806, however he abdicated in 1810 when Napoleon annexed Holland. The French were expelled in 1813, and all the provinces of Holland and Belgium were merged into the Kingdom of the United Netherlands under William I, in 1814. The Belgians withdrew in 1830 to form their own kingdom, the last substantial change in the configuration of European Netherlands.

RULERS
United Netherlands, 1543-1795
BATAVIAN REPUBLIC
French domination, 1795-1806
KINGDOM OF HOLLAND
French Protectorate
Louis Napoleon, 1806-1810
FRENCH ANNEXATION
Napoleon I, 1810-1814
KINGDOM OF THE NETHERLANDS
William I, 1815-1840
William II, 1840-1849
William III, 1849-1890
Wilhelmina I, 1890-1948

MINT MARKS
B - Brussels (Belgium), 1821-1830
D - Denver, 1943-1945
P - Philadelphia, 1941-1945
S - San Francisco, 1944-1945

MINT PRIVY MARKS

NOTE: A star adjoining the privy mark indicates that the piece was struck at the beginning of the term of office of a successor. (The star was used only if the successor had not chosen his own mark yet.)

MONETARY SYSTEM
1 Penning = 1/2 Duit
2 Duits = 1 Oord
8 Duits = 1 Stuiver (Stiver)
6 Stuiver = 1 Schelling
20 Stuiver = 1 Gulden (Guilder or Florin)
50 Stuiver = 1 Rijksdaalder (Silver Ducat)
60 Stuiver = 1 Ducaton (Silver Rider)
14 Gulden = 1 Golden Rider
Commencing 1815
100 Cents = 1 Gulden
2-1/2 Gulden = 1 Rijksdaalder

BATAVIAN REPUBLIC

From 1796 to 1806, the Netherlands was a confederation of seven provinces, each producing coins similar in design but differing in the coat of arms or inscription. Generally the coins of each province contained an abbreviation of the name of the province somewhere in the inscription. Under the Batavian Republic, the following abbreviations were used.

PROVINCE ABBREVIATIONS
G, GEL - Gelderland
HOL, HOLL - Holland
TRANSI - Overijsel
TRA, TRAI, TRAIECTUM - Utrecht
WESTF, WESTRI - Westfriesland
ZEL, ZEELANDIA - Zeeland

1853	—	25.00	100	200	400	—

The Netherlands East Indies of the 19th century, ruled by the Dutch with brief sojourns under the British would now be provinces of Sumatra, a part of the Republic of Indonesia. The islands of Indonesia are made up partly of the Malay Archipelago, which encompasses 3,000 islands, which is the largest in the world.

Had Columbus succeeded in reaching the fabled Spice Islands, he would have found advanced civilizations a millennium old, and temples still ranked among the finest examples of ancient art. During the opening centuries of the Christian era, the islands were influenced by Hindu priests and traders who spread their culture and religion. Moslem invasions began in the 13th century, fragmenting the island kingdoms into small states which were unable to resist Western colonial infiltration. Portuguese traders established posts in the 16th century, but they were soon outnumbered by the Dutch who arrived in 1596 and gradually asserted control over the islands comprising present-day Indonesia. Dutch dominance, interrupted by British incursions during the Napoleonic Wars, established the Netherlands East Indies as one of the richest colonial possessions in the world.

The VOC (United East India Company) struck coins and emergency issues for the Indonesian Archipelago and for the islands at various mints in the Netherlands and the islands. In 1798 the VOC was subsumed by the Dutch government, which issued VOC type transitional and regal types during the Batavian Republic and the Kingdom of the Netherlands until independence. The British issued a coinage during the various occupations by the British East Indian Company, 1811-24. Modern coinage issued by the Republic of Indonesia includes separate series for West Irian and for the Riau Archipelago, an area of small islands between Singapore and Sumatra.

RULERS
Batavian Republic, 1799-1806
Louis Napoleon, King of Holland, 1806-1811
Dutch, 1816-1942

MINT MARKS

Broad axe	1875-87	Utrecht
Broad axe and star	1887	Utrecht
Halberd	1888-1909	Utrecht

MONETARY SYSTEM
120 Duits = 120 Cents
1 Gulden = 1 Java Rupee
16 Silver Rupees = 1 Gold Mohur

BONKS: Because of the slow delivery of coins from the Netherlands, the government in the East Indies often resorted to the manufacture of "Bonks". These were simply lumps cut from the copper (or tin) rods used for coining. This eliminated the problems inherent in casting round coins and allowed the production of large quantities of legal tender very quickly. The thicker rods were used for the 2 and 8 Stuiver Bonks and the thinner rod for the smaller denominations.

DUITS: On many of the Duit and 1/2 Duit coins of the East Indies dated 1802-1826, the value appears as 5-1/32-G (1/2 Duit) and 5-1/16-G (Duit). This is interpreted as; 5 of the pieces equal 1/16 Guilder or 5 equal 1/32 Guilder. However, in 1802 the rate of exchange was set so that 6 Duiten should equal 1/16 Guilder which would mean the Duit actually equaled 1/96 Guilder and the1/2 Duit equaled 1/192 Guilder, but because of the perennial shortage of small coins, the error was ignored and the coins released to circulation.

CENTS: Although some coins in 1833-1841 appear with value as 1 CT (1 Cent) and 2 CT (2 Cent) they are considered Duiten and Double Duiten and were exchanged at the rate of 1 Duit = 1/96 Guilder, not on a decimal system.

LOCAL TOKEN ISSUES

MONETARY SYSTEM
10 Pitis = 1 Keping
900-4,000 Pitis = 1 Ringgit (Dollar)
1280 Trah = 1 Ringgit
100 Pice (Cents) = 1 Ringgit

DENOMINATIONS
The following Arabic legends appear for the denomination with an Arabic number above.

(1)Keping — Sakeping — Satu Keping

(2) Dua Keping

NOTE: Many local merchant tokens, inscribed mainly in Chinese, exist for most of the Malay states. These have not been listed.

ATJEH

(Achinm, Acheen, Atchin)

Kingdom in northernmost Sumatra, former sultanate visited by the Portuguese in 1506, later the Dutch and English East India companies. At its peak of power in the early 1600's it dominated the entire western strip of Sumatra. It was under English control until seded to Dutch. Never completely under Dutch control, it rebelled in 1953, became a province 1956, unrest continues.

CELEBES

(Also known as Sulawesi)

Actually refers to South Celebes. Island in Malay Archipelago east of Borneo, 72,775 sq. mi. (188, 487 sq. km.). Population 12,520,711.

Muslims may have been first visitors in 15th century; Portuguese arrived around 1512 to develop spice trade of the Moluccas. Dutch established first settlement in 1607 at Makasar. Many wars between Dutch settlers and native sultans. Dutch Rule slowly established by the 20th century. Overrun by Japanese in WWII. Surrendered in 1945, became part of Indonesia Republic in 1950. Communist rebellion was suppressed in 1965, unrest continues.

MALUKA

A private estate in southern Borneo founded by the Englishman, Alexander Hare in 1812 acquired through a grant from the local sultan. The state existed from 1812 to 1818. The coins were made at a mint in the state in 1812 and 1813. The state ceased to exist when the area was repossessed by the Dutch in 1818.

SULTANA, ISLAND OF

An island, south of the Malay Peninsula, was first reached by Europeans for trade in 1599. Competition between European powers for trading rights continued until 1824 at which time it became a Dutch possession. British coins for the island were struck at the Birmingham Mint by Matthew Boulton in 1786 and other issues were struck at Indian mints.

NEVIS

Nevis, a component of one of the West Indies Associated States, is located in the Leeward Islands and has an area of 50 sq. mi. (105 sq. km.).

Nevis was discovered by Columbus in 1493. It was first colonized by the English in 1628. Admiral De Grasse captured the island for France in 1782, but it was restored to Britain the following year. Alexander Hamilton, first Secretary of the Treasury, was born on Nevis in 1757.

New Zealand, a parliamentary state located in the Southwest Pacific 1,250 miles (2,011 km.) east of Australia, has an area of 103,883 sq. mi. (268,680 sq. km.).

The first European to sight New Zealand was the Dutch navigator Abel Tasman in 1642. The islands were explored by British navigator Capt. James Cook who surveyed it in 1769 and annexed the land to Great Britain. The British government disavowed the annexation and for the next 70 years the only white settlers to arrive were adventurers attracted by the prospects of lumbering, sealing and whaling. Great Britain annexed the land in 1840 by treaty with the native chiefs and made it a dependency of New South Wales. Full internal and external autonomy, which New Zealand had in effect possessed for many years, was formally extended in 1947.

5 Shillings = 1 Crown
20 Shillings = 1 Pound
2 Dollars = 1 Pound

TOKEN COINAGE

Because of a shortage of British money, New Zealand merchant tokens were issued beginning in 1857. There were some 147 varieties issued in 10 cities, although the majority were issued in Auckland, Christchurch, Wellington and Dunedin. Issuance was discontinued in 1881, but they continued to circulate until 1897 when British copper and silver and Australian gold became plentiful. Almost all tokens bear the name of the city and the issuing merchant, but few have a stated value so the user had to rely on size and weight – a very irregular standard to determine value. Most tokens are of copper, a few are bronze.

The Republic of Nicaragua, situated in Central America between Honduras and Costa Rica, has an area of 50,193 sq. mi. (129,494 sq. km.).

Columbus sighted the coast of Nicaragua on Sept. 12,1502 during the course of his last voyage of discovery. It was first visited in 1522 by conquistadors from Panama, under the command of Gil Gonzalez. Francisco Hernandez de Cordoba established the first settlements in 1524 at Granada and Leon. Nicaragua was incorporated, for administrative purpose, in the Captaincy General of Guatemala, which included every Central American state but Panama. On September 15, 1821 the Captaincy General of Guatemala declared itself and all the Central American provinces independent of Spain. The next year Nicaragua united with the Mexican Empire of Augustin de Iturbide, only to join in 1823 the federation of the Central American Republic. Within Nicaragua rival cities or juntas such as Leon, Granada and El Viejo vied for power, wealth and influence, often attacking each other at will. To further prove their legitimacy as well as provide an acceptable circulating coinage in those turbulent times (1821-1825), provisional mints functioned intermittently at Granada, Leon and El Viejo. The early coinage reflected traditional but crude Spanish colonial cob-style designs. Nicaragua's first governor was Pedro Arias Davila, appointed on June 1, 1827. When the federation was dissolved, Nicaragua declared itself an independent republic on April 30, 1838.

Dissension between the Liberals and Conservatives of the contending cities kept Nicaragua in turmoil, which made it possible for William Walker to make himself President in 1855. The two major political parties finally united to drive him out and in 1857 he was expelled. A relative peace followed, but by 1912, Nicaragua had requested the U.S. Marines to restore order, which began a U.S. involvement that lasted until the Good Neighbor Policy was adopted in 1933.

MERCADO DE LEON

By executive decree, the government of Nicaraguaon September 12, 1859, authorized the municipalityof Leon to mint between 100 and 200 Pesos in coppercents and half cents. The first known documentationof this right being exercised came in 1877 when theHeaton Mint was contracted to strike the followingpieces. The 1/12 Dime and 1/24 Dime were valued ata fraction of the United States dime as both the U.S.half dime and dime were authorized as legal tender andcirculated heavily in Nicaragua during this period.

Nigeria, situated on the Atlantic coast of West Africa has an area of 356,669 sq. mi. (923,770 sq. km.).

Following the Napoleonic Wars, the British expanded their trade with the interior of Nigeria. The Berlin Conference of 1885 recognized British claims to a sphere of influence in that area, and in the following year the Royal Niger Company was chartered. Direct British control of the territory was initiated in 1900, and in 1914 the amalgamation of Northern and Southern Nigeria into the Colony and Protectorate of Nigeria was effected.

For earlier coinage refer to British West Africa.

FEDERAL REPUBLIC

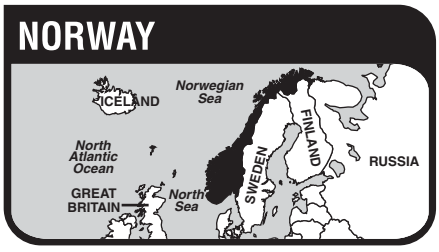
TOKEN COINAGE

KM# Tn2 1/8 PENNY

Copper **Issuer:** Mac Gregor Laird

Date	Mintage	F	VF	XF	Unc	BU
AH1858//AH1274	1,858	65.00	125	225	375	—

Note: Three die varieties exist; Variously attributed to Guinea, Gold Coast, Sierra Leone and West Africa, this token, struck in 1858, was intended to circulate at the MacGregor Laird trading posts located along the Niger and Benue rivers; In 1885 this region became the British Protectorate of Nigeria



The Kingdom of Norway (*Norge, Noreg*), a constitutional monarchy located in northwestern Europe, has an area of 150,000sq. mi. (324,220 sq. km.), including the island territories of Spitzbergen (Svalbard) and Jan Mayen. Capital: Oslo (Christiana).

A united Norwegian kingdom was established in the 9th century, the era of the indomitable Norse Vikings who ranged far and wide, visiting the coasts of northwestern Europe, the Mediterranean, Greenland and North America. In the 13th century the Norse kingdom was united briefly with Sweden, then passed through inheritance in 1380 to the rule of Denmark which was maintained until 1814. In 1814 Norway fell again under the rule of Sweden.

The Republic of Paraguay, a landlocked country in the heart of South America surrounded by Argentina, Bolivia and Brazil, has an area of 157,048 sq. mi. (406,750 sq. km.).

Paraguay was first visited by Alejo Garcia, a shipwrecked Spaniard, in 1524. The interior was explored by Sebastian Cabot in 1527 and 1528, when he sailed up the Parana and Paraguay rivers. Asuncion, which would become the center of a Spanish colonial province embracing much of southern South America, was established by the Spanish explorer Juan de Salazar on Aug. 15,1537. For 150 years the history of Paraguay was largely the history of the agricultural colonies established by the Jesuits in the south and east to Christianize the Indians. In 1811, following the outbreak of the South American wars of independence, Paraguayan patriots overthrew the local Spanish authorities and proclaimed their country's independence.

During the Triple Alliance War (1864-1870) in which Paraguay faced Argentina, Brazil and Uruguay, Asuncion's ladies gathered in an Assembly on Feb. 24, 1867 and decided to give up their jewelry in order to help the national defense. The President of the Republic, Francisco Solano Lopez accepted the offering and ordered one twentieth of it be used to mint the first Paraguayan gold coins according to the Decree of the 11th of Sept.,1867.

Two dies were made, one by Bouvet, and another by an American, Leonard Charles, while only the die made by Bouvet was eventually used.

CUT AND COUNTERMARKED COINAGE

War of the Triple Alliance

In 1864 Brazil sent troops into Uruguay to help quell a civil war. Paraguay, which had harbored border disputes with both Brazil and Argentina, took this occasion to declare war on Brazil. In 1865, the Paraguayan military attempted to cross Argentina with hopes of attacking southern Brazil. This armed aggression pushed Argentina, Brazil and Uruguay to form a triple alliance against Paraguay with the intent to overthrow their government and settle all boundary disputes on the terms of the allies.

The resulting War of the Triple Alliance lasted until March of 1870, decimating the Paraguayan population and leaving them at the mercy of their neighbors. New borders were established with Brazil in 1872 and Argentina in 1876, at which time all occupation troops were withdrawn.

During the war both Brazil and Paraguay used some cut and countermarked coins as emergency currency. Spanish and Spanish colonial coins were already in circulation and cut fractions were often being used in local trade. These pieces became the hosts for Brazilian countermarks in denominations of 100 Reis, 200 Reis and 400 Reis, as well as Paraguayan countermarks in denominations of 1 Real, 2 Reales and 4 Pesos Fuertes. Many examples have crenulated, curved or wavy edge cuts.

All cut coins, including these emergency countermarked issues, were outlawed in Paraguay by decree of February 24, 1872.

The Republic of Peru, located on the Pacific coast of South America, has an area of 496,225 sq. mi. (1,285,220sq. km.) and a population of *21.4 million. Capital: Lima. The diversified economy includes mining, fishing and agriculture. Fish meal, copper, sugar, zinc and iron ore are exported.

Once part of the great Inca Empire that reached from northern Ecuador to central Chile, the conquest of Peru by Francisco Pizarro began in 1531. Desirable as the richest of the Spanish viceroyalties, it was torn by warfare between avaricious Spaniards until the arrival in 1569 of Francisco de Toledo, who initiated 2-1/2 centuries of efficient colonial rule, which made Lima the most aristocratic colonial capital and the stronghold of Spain's American possessions. Jose de San Martin of Argentina proclaimed Peru's independence on July 28, 1821;Simon Bolivar of Venezuela secured it in December, 1824 when he defeated the last Spanish army in South America. After several futile attempts to re-establish its South American empire, Spain recognized Peru's independence in 1879.

Andres de Santa Cruz, whose mother was a high-ranking Inca, was the best of Bolivia's early presidents, and temporarily united Peru and Bolivia 1836-39, thus realizing his dream of a Peruvian/Bolivian confederation. This prompted the separate coinages of North and South Peru. Peruvian resistance and Chilean intervention finally broke up the confederation, sending Santa Cruz into exile. A succession of military strongman presidents ruled Peru until Marshall Castilla revitalized Peruvian politics in themid-19th century and repulsed Spain's attempt to reclaim its one-time colony. Subsequent loss of southern territory to Chile in the War of the Pacific, 1879-81, and gradually increasing rejection of foreign economic domination, combined with recent serious inflation, affected the country numismatically.

As a result of the discovery of silver at Potosi in 1545, a mint was eventually authorized in 1565with the first coinage taking place in 1568. The mint had an uneven life span during the Spanish Colonial period from 1568-72. It was closed from 1573-76, reopened from 1577-88. It remained closed until 1659-1660 when an unauthorized coinage in both silver and gold were struck. After being closed in 1660, it remained closed until 1684 when it struck cob style coins until 1752.

RULER
Spanish until 1822

MINT MARKS
AREQUIPA, AREQ = Arequipa
AYACUCHO = Ayacucho
CUZCO (monogram), Cuzco, Co. Cuzco
L, LIMAE (monogram), Lima
(monogram), LIMA = Lima
PASCO (monogram), Pasco, Paz, Po= Pasco

  

NOTE: The LIMAE monogram appears in three forms. The early LM monogram form looks like a dotted L with M. The later LIMAE monogram has all the letters of LIMAE more readily distinguishable. The third form appears as an M monogram during early Republican issues.

MINT ASSAYERS' INITIALS

Initials	Date	Name
H, Ho	1699-1705	
H, Ho	1707-08	
H, Ho	1710	
M	1694, 1709 1711-28	
N	1728-40 1699, 1706	Joaquin Negrow
R	1748-52	Jose Rodriguez
R	1698-1701,1706	

The letter(s) following the dates of Peruvian coins are the assayer's initials appearing on the coins. They generally appear at the 11 o'clock position on the Colonial coinage and at the 5 o'clock position along the rim on the obverse or reverse on the Republican coinage.
